

## About bpm'online

Bpm'online is a premium vendor of process-driven cloud based software for marketing, sales and service automation. The beauty and core value of bpm'online products are the out-of-the-box processes that guide users through the most effective actions to accelerate results. Users love bpm'online's engaging interface with its social look and feel, free from redundant information that keeps them focused on what's relevant.

Use bpm'online products to connect the dots between marketing, sales and customer service, efficiently managing the complete customer journey – from lead to order, and to ongoing account maintenance.
