

**When it comes to looking inside the body for signs of disease, few procedures offer as much information with so quickly and non-invasively as an X ray. With the installation of our state of the art digital radiology system, we can have detailed X- ray images of your pet in less than five seconds! Not only is this system fast, it provides extremely high resolution and detail for improved diagnostic accuracy. These digital images also can be easily shared with Board Certified radiologists when an expert second opinion is indicated.**
