

Fremont Street HWY 32/57 DOT Project 2030

In 2029-2030 HWY 32/57 thru town starting at the South Roundabout to Park Avenue will be reconstructed with new pavement. Also, as part of the reconstruction, the bridge on First Street will be replaced along with all utilities, curb, and sidewalk between First Street and Seventh Street.

The city is working on the details of the reconstruction with the DOT and as part of that, has the ability to recommend enhancements to DOT reconstruction design. The questions on this form will help in the process of finalizing enhancements as we reach final design. *Please be aware that based on the enhancements the city chooses, outside of what the DOT considers standard, come at additional cost and long term maintenance to the city. Those questions that have additional cost and maintenance have a standard selection to the question.

Please answer each question with what you feel you would like to see as part of the Fremont Street reconstruction between First Street and Seventh.
