Future Automotive Technicians Honored At Crest

The Crest High Automotive Tech Seniors were recently honored at a luncheon and awards banquet for their achievements. The event was sponsored by Cleveland County automotive dealers and suppliers. David Mull, Service Director of Rector Ford and Chairman for the event said: "This is another year of our rising young talent devoted to automotive technology. These students are a great investment for our future." Brian Proctor (right), Crest instructor presented a Certificate of Achievement Award to Nikk Mathon, the first lady to graduate from this technical program. Senior Automotive Tech students were also given gifts at the luncheon.

South Mountains State Park One Of Our Great Gifts Of Nature

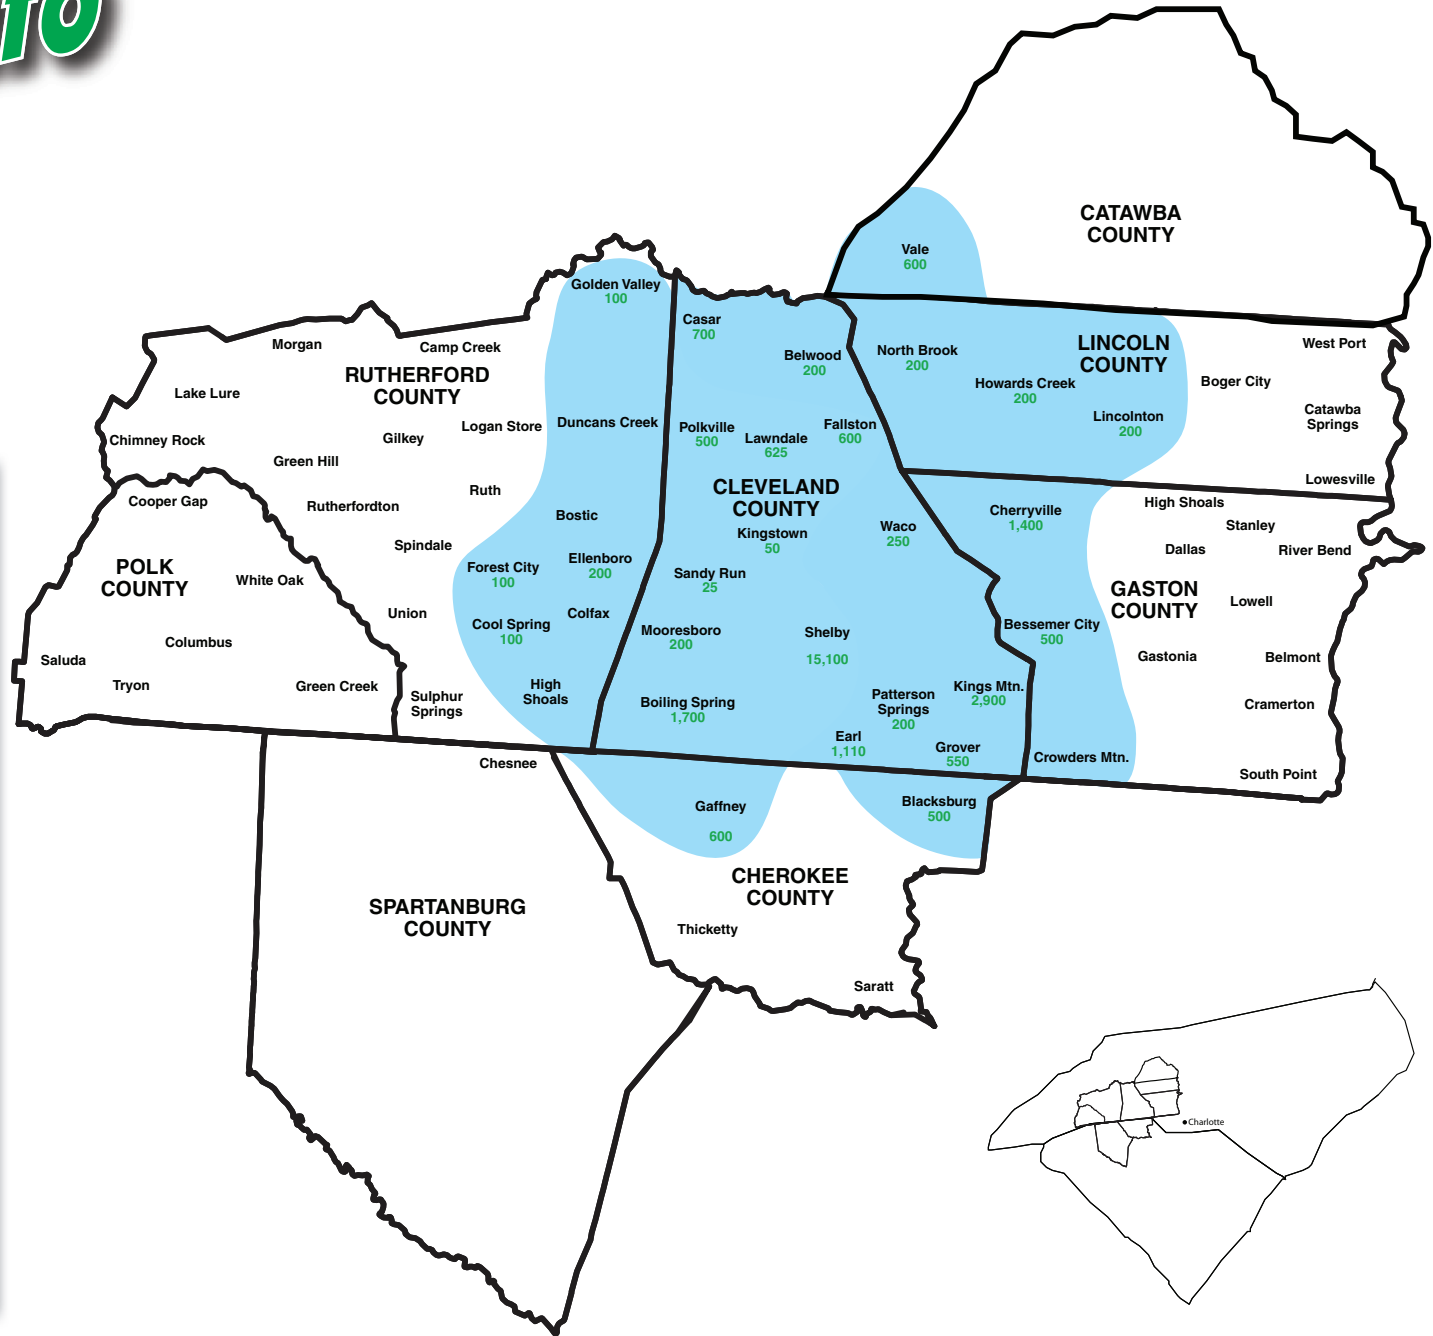

It is a treasure! South Mountains State Park offers gifts of nature, instruction and guidance that should make other states and areas envious! This magnificent panorama of nature's offerings should be enjoyed and used, but never abused. It is all there and each time you visit, you are impressed. It's a wonderful family environment where horses can be ridden, discovered, made along miles of trails and the sport of fishing is welcomed. I attended a very interesting session offered by Park Ranger Lance Haas on "Fishing Ethics". It was a curiosity that had to be satisfied. I was not aware of fishing ethics but was aware of the tremendous amount of information we have in our area and state. Park Ranger Lance Haas is very informative and he was well prepared to teach us about "Fishing Ethics".
