BRIEF DESCRIPTION OF PROPERTY (historic use of property, property ownership, current use)

DESCRIPTION OF PROPOSED ACTION (include specific use proposed, # of employees, hrs, etc)

USE VARIANCE STANDARDS:

Application for use variances must be based on alleviating a clearly demonstrated hardship, as opposed to a special privilege of convenience sought by the owner (hardship can not be self-created). Furthermore, the hardship must be unique to the land or building in question and must not generally apply to a substantial portion of the land throughout the district or neighborhood or alter the essential character of the neighborhood.

DESCRIPTION OF HARDSHIP (describe the features or conditions of the property that restrict reasonable use of the property under current zoning regulations. Please demonstrate that there is a lack of substantial reasonable return i.e.; competent financial evidence)

COMPATIBILITY WITH NEIGHBORHOOD (describe the manner in which the proposed use is unique to the property, will be consistent with adjoining development, will not cause substantial injury to neighboring properties or alter the essential character of the neighborhood in any way)

APPLICATION ATTACHMENTS:

To insure appropriate and timely review of the application, please provide the following additional documentation in support of the application. Failure to provide all of the applicable materials listed below may result in a delay in scheduling the application for review or Hearing by the Zoning Board of Appeals.

**MANDATORY REFERRAL
TO
CHAUTAUQUA COUNTY
PLANNING BOARD**

In accordance with General Municipal Law 239-1 and 239-m, before issuing a special use permit or granting a variance affecting any real property lying within a distance of 500 feet of the boundary of this municipality or from the boundary of any existing or proposed county or state park or other recreation area, or from the right-of-way of any existing or proposed county or state parkway, thruway, expressway, road or highway, or from the channel owned by the county or for which the county has established channel lines, or from the existing or proposed boundary of any county or state owned land on which a public building or institution is situated, the matter shall be referred to the Chautauqua County Planning Board.

Within 30 days after receipt of the full statement of such referred matter, the Chautauqua County Planning Board to which the referral is made, or an authorized agent of said agency, shall report its recommendations thereon to the Board of Appeals, accompanied by a full statement of the reasons for such recommendations. If the Chautauqua County Planning Board fails to report within such period of 30 days, the Board of Appeals may act without such report. If the Chautauqua County Planning Board disapproved the proposal, or recommends modification thereof, the Board of Appeals shall not act contrary to such disapproval or recommendations except by a vote of a majority plus one of all members thereof and after the adoption of a resolution fully setting forth the reasons for such contrary action.

Within seven (7) days after final action by the Board of Appeals, modifications or disapproval of a referred matter, the Board of Appeals shall file a report of the final action it has taken with the Chautauqua County Planning Board which had made the recommendations, modifications or disapproval.

Matters to be referred to Chautauqua County Planning Board:

- adoption or amendment of a zoning map or regulations
- adoption or amendment of a comprehensive plan
- issuance of special use permits
- approval of site plans
- granting or use or area variances
- other authorization which a referring body may issue under the provisions of any zoning or local law

Through a legal agreement with Chautauqua County Planning Board the Town of Pomfret Zoning Board of Appeals have had the following actions exempt from referral for County review:

Residential Area Variances:

- Rear & Side Building Setbacks
- Fences
- Decks
- Minimum Building Size
- Minimum Building Lot Size
- Size & Height of Garages
- Number of Storage Sheds
- Subdivision of Lots

SEQR REQUIREMENTS

New York's State Environmental Quality Review Act (SEQR) requires all state and local government agencies to consider environmental impacts equally with social and economic factors during discretionary decision-making. This means these agencies must assess the environmental significance of all actions they have discretion to approve, fund or directly undertake. SEQR requires the agencies to balance the environmental impacts with social and economic factors when deciding to approve or undertake an "Action"

If an action is determined not to have significant adverse environmental impacts, a determination of no significance or Negative Declaration is prepared. If an action is determined to have potential significant adverse environmental impacts, an Environmental Impact Statement (EIS) is required.

The SEQR process uses the EIS to examine ways to avoid or reduce adverse environmental impacts related to a proposed action. This includes an analysis of all reasonable alternatives to the action. The SEQR "decision making process" encourages communication among government agencies, project sponsors and the general public.

Actions are classified into 3 different categories. The classification of the action will determine the level of initial environmental review that the project will receive, which could consist of: No further review; Full (Long form) EAF or Short Form and To Coordinate or not to coordinate with other agencies.

Type I Classification Actions - are most likely to have significant adverse impact on environment, so are more likely to require EIS. (Not all Type I Actions are an automatic EIS requirement.)

Some Examples:

- Large Residential facilities (in context of existing community size)
- In or "substantially contiguous to" Historical Register listed or eligible sites or parks
- Affecting agricultural districts
- Purchase, sale or other transfer of more than 100 acres

***Type I classifications require that the SEQR process continue**

Type II Classification Actions - have been determined not to have a significant adverse impact on the environment and therefore do not require an EIS

Some Examples:

- Most Maintenance or repairs - including upgrading building to meet building and fire codes
- 1, 2 or 3 family homes on approved lots
- New non-residential uses under 4,000 square feet (requiring no zoning change or use variance)
- Purchase or sale of supplies or equipment - land transactions not covered
- Minor structures, such as garages, barns, or home swimming pools, routine permit and license renewal with no substantial change in permitted activities
- Rebuilding or replacement of facilities, in kind, on the same site

***Type II classifications conclude at SEQR**

Unlisted Classification Actions - are any proposals or actions not specifically included on either the statewide Type I or Type II lists. This is the largest category of actions subject to SEQR review. Specific items are not listed since it is impossible to identify in advance every potential project or decision which an agency may need to consider.

Some Examples:

- New 20 unit apartment building
- New non-residential use of 10 acres or less
- Parking for less than 1,000 cars
- Sale, purchase, lease or other transfer of fewer than 100 acres of land by government entity

NOTE: The SEQR regulations allow an agency to choose to apply the Type I initial review process to any unlisted action. Therefore it is reasonable to treat any large or complex project that has been classified as Unlisted, as a Type I action.

***Required that SEQR continue**

Please complete Part I of the attached *Short Environmental Assessment Form* as a required part of the Zoning Board of Appeals Application process. Thank you.

STOP! THE ZBA WILL COMPLETE PART 2 AT THE SCHEDULED HEARING

Part 2 - Impact Assessment. The Lead Agency is responsible for the completion of Part 2. Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted by the project sponsor or otherwise available to the reviewer. When answering the questions the reviewer should be guided by the concept "Have my responses been reasonable considering the scale and context of the proposed action?"

	No, or small impact may occur	Moderate to large impact may occur
1. Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?		
2. Will the proposed action result in a change in the use or intensity of use of land?		
3. Will the proposed action impair the character or quality of the existing community?		
4. Will the proposed action have an impact on the environmental characteristics that caused the establishment of a Critical Environmental Area (CEA)?		
5. Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?		
6. Will the proposed action cause an increase in the use of energy and it fails to incorporate reasonably available energy conservation or renewable energy opportunities?		
7. Will the proposed action impact existing: a. public / private water supplies? b. public / private wastewater treatment utilities?		
8. Will the proposed action impair the character or quality of important historic, archaeological, architectural or aesthetic resources?		
9. Will the proposed action result in an adverse change to natural resources (e.g., wetlands, waterbodies, groundwater, air quality, flora and fauna)?		

	No, or small impact may occur	Moderate to large impact may occur
10. Will the proposed action result in an increase in the potential for erosion, flooding or drainage problems?		
11. Will the proposed action create a hazard to environmental resources or human health?		

Part 3 - Determination of significance. The Lead Agency is responsible for the completion of Part 3. For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
