

Ronald T. Hamme

Professional Engineer

PROFILE:

Mr. Hamme has been involved in Structural Engineering since graduation from UMR in 1992. During that time Ron has designed single and multiple story-buildings as well as other commercial structures. As the leader of our Structural Department, Ron's attention to detail and proven ability to complete projects according to specifications, on time and within budget has been an asset.

PROJECT DESIGN SKILLS:

- Steel Design
- Concrete Design
- Masonry Design
- Wood Design
- Building Elevations
- Forensic Investigation
- Bridge Design

LICENSES:

Missouri – LN 028139

Arkansas – LN 9752

In addition, licensed in 18 states.

University of Missouri

Rolla, BSCE | 1992

Of Note:

As the head of our Structural Engineering Department Ron is a strategic leader with excellent interpersonal skills who takes pride in providing the support required to drive projects to successful completion. Experienced in both management as well as design Ron is committed to the highest standards of quality control with a focus on innovative modeling and consistent experimental analysis. Mr. Hamme is responsible for designing the most cost-effective structures utilizing innovative methods and procedures. He is also responsible for seeing projects through and satisfying the requirements of both the client and owner.
