Additional information to help you complete your virtual consultation form

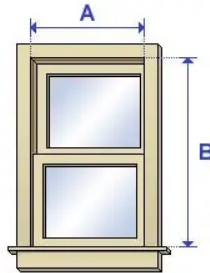

Also see SAMPLE page

Window Style:

Find the picture that best describes your window and enter the code (i.e., (CA) for casement). Use the Notes section on that line to include any additional information

Width and Height:

Measure from jamb to jamb for width and height.

Mulled Units:

Mulled windows are separate windows that are attached together (mulled) to fit a large opening. If you have mulled windows, list them separately, and draw a line through each that connect (in the "Mulled" box).

Tempered Glass:

Tempered glass (safety glass) is required in certain circumstances. If any of your windows are in the following areas, they probably have tempered glass:

In a bathroom, within 5-feet of a tub or shower

In a stairwell

If the bottom of the window is less than 18-inches from the floor

If in a pool area

If within 24-inches of an entry door

Frosted Glass:

Frosted glass is cloudy or opaque. Typically found in bathrooms for privacy.

Grids:

For grids, please indicate if the grids are "Inside" (between two panes of glass) or "Outside" (on the outside of the glass).
