Dave Wilson Nursery varieties for 2019:

Fuji Apple Introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid-September. Excellent pollinizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6-9.

Gala Apple Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish orange over yellow. Early harvest, 2 - 3 weeks before Red Delicious. Good pollinizer for other varieties. Adapted to cold- and warm-winter climates. Chilling requirement less than 500 hours. Self-fruitful. USDA Zones 4-10.

Golden Delicious Apple Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollinizer for Red Delicious. Midseason harvest (September in Central CA). 700 hours. Self-fruitful. USDA Zones 5-10.

Granny Smith Apple From New Zealand. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 400 hours. Prolonged bloom: good pollinizer for other apples. Self-fruitful. USDA Zones 6-9.

Honeycrisp Apple Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Striped red over yellow color. Stores well. Ripens mid-August. Pollenized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. USDA Zones 3-8.

McIntosh Apple Round, bright to dark red over green, superb quality in cool climates. Crisp, aromatic, subacid & sweet. Dessert/cooking. Early harvest. 900 hours. Partly self-fruitful, or pollenized by Red Delicious, Gala, or other. USDA Zones 4-7.

Multi-Bud Apple, Fuji-Gala-Mutsu-Jonagold Fuji, Gala, Mutsu and Jonagold budded onto M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Pink Lady® Apple Hot climate apple from Western Australia. Very crisp, sweet tart, distinct flavor, good keeper. Skin reddish pink over green when ripe. White flesh resists browning. Harvest begins late October in Central CA, about three weeks after Fuji. Self-fruitful. 300-400 hours. USDA Zones 6-9.

Red Delicious (Harrold) Apple Early fall fruit is sweet, crisp and fine flavored. Vigorous, productive tree. Good pollinizer for almost all other apples. 700 hours. Pollenized by Fuji, Gala, Granny Smith, or Golden Delicious. USDA Zones 5-8.

Chinese Apricot Cold hardy, frost hardy, sets heavy crops of small to medium size sweet fruit. Recommended for difficult climates prone to spring frosts. 700 hours. Self-fruitful. USDA Zones 4-7.

Harcot Apricot From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit ripens early to mid-June in Central CA. Sweet, juicy, rich flavor one of the best. 700 hours. Self-fruitful.

Puget Gold Apricot Proven producer of large, flavorful fruit in Western Washington. Recommended for other western climates where spring rains and frosts limit apricot culture. Harvest early August. 600 hours. Self-fruitful. USDA Zones 6-9.

Leah Cot Aprium® Interspecific Apricot Large size Aprium® with deep orange color inside and out. Reliable annual bearer, high flavor and firm texture, ripens mid to late June in Central California, just after Flavor Delight Aprium®. Self-fruitful, required chill 500 hours or less, best in zones 7-10. U.S. Plant Patent No. 21863 (Zaiger)

20th Century Asian Pear Juicy, sweet, mild flavored fruit is crisp like an apple. Early to mid-August in Central CA. Keeps well. Easy to grow, heavy bearing small tree. 300-400 hours. Self-fruitful or pollenized. by Shinseiki, Bartlett, or other.

Shinseiki Asian Pear Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early August in Central CA. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 250-300 hours. Self-fruitful.

Bing Cherry Large, firm, juicy, sweet, nearly black when ripe. Superb flavor, the No. 1 cherry. Midseason. Large vigorous tree. Pollenized by Black Tart, Van, Rainier and Lapins. Also Stella in colder climates. 700 hours. USDA Zones 5-9.

Black Tartarian Cherry Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollinizer required - interfruitful with all popular sweet cherries. USDA Zones 5-7.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Craig's Crimson Cherry Taste test winner. Self-fruitful, natural semi-dwarf sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard (smaller when budded onto Colt or Mahaleb rootstock). Harvest begins early. 500-600 hours. USDA Zones 5-9. (Zaiger)

Lambert Cherry Large, black, late harvest. Highest quality, rivaling Bing. Less susceptible to cracking due to later season. 800 hours. Pollenized by Van, Rainier, or Black Tartarian. USDA Zones 5-9.

Lapins Cherry Self-fruitful, dark red sweet cherry from Canada. Large, firm, good flavor. Similar to Van in color, Bing in shape. Sometimes sold as 'Self-fertile Bing.' Ripens 4 days after Bing. 400 hours or less. USDA Zones 5-9.

Multi-Bud Cherry, Rainier-Bing-Utah Giant-Van Rainier, Bing, Utah Giant and Van budded onto Mazzard rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Utah Giant Cherry The industry favorite sweet cherry in Utah. Larger, firmer, more flavorful than Bing or Lambert. Good canner. Does not double. 800 hours. Pollenizer required: Bing, Lambert, Rainier, Van. USDA Zones 5-9.

Van Cherry Very cold hardy, reliable, heavy bearing. Fine fruit similar to Bing, though usually smaller. 700 hours. Pollenizer required - interfruitful with all popular sweet cherries. USDA Zones 4-9.

Green Gage (Bavay's) European Plum Superior selection of gage-type European plum. Small to medium-sized, richly flavored & very sweet. Excellent fresh and for cooking. More productive in moderate winter climates than common Green Gage. Originated in Belgium in 19th century. Estimated winter chilling requirement 700 hours. Self-fruitful.

Black Mission Fig The industry standard. Purplish-black skin, strawberry-colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Two crops per year. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

Chicago Hardy Fig Late season mahogany to purple fruit are set on current season's growth. One of the most frost hardy of all figs. Known to grow into zone 5. Little to no breba crop. Best quality late summer through fall. Required chill 100 hours or less. Self-fruitful. Best in zones 6-10

Improved Brown Turkey Fig Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted - coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful. USDA Zones 7-9.

Kadota Fig Large, light greenish-yellow 'white' skin, amber flesh. Long-lived, vigorous. Prune to any shape. Very sweet fruit needs hot weather to ripen. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

Panache Fig Especially fine flavor! Small to medium-sized fruit with green color and yellow Tiger stripes. Strawberry pulp is blood-red in color. 100 hours. Self-fruitful.

Violette de Bordeaux Fig Small to medium size purple-black fruit with a very deep red strawberry pulp and distinctive, sweet, rich flavor. Brebas are pear-shaped with a thick, tapering neck, main crop figs are variable, often without neck. Medium eye. Excellent fresh or dried. Good for container culture or small spaces. Hardy. Self-fruitful. USDA Zones 5-10.

Multi-Bud Fruit Salad, Cold Hardy, Polly-Hrkn-Hrko-Hrct-Supr Polly White Peach, Harken Peach, Harko Nectarine, Harcot Apricot and Superior Plum budded onto Citation rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Multi-Bud Fruit Salad, GDust-Indep-JulElb-LSRosa-Blenheim Gold Dust Peach, Independence Nectarine, July Elberta Peach, Late Santa Rosa Plum and Blenheim Apricot budded onto Lovell rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Pakistan Fruiting Mulberry *Morus alba* 'Pakistan' Long (3 inches), firm, red to black, sweet fruit. Non-staining juice. Month-long early summer harvest. Fruit used fresh and for pies, jams and jellies. Large, vigorous, disease-resistant tree.

Garden Delight Miniature Nectarine Large yellow freestone is sweet, delicious, refreshing. Mid-August in Central CA. Heavy bearing 5-6 ft. tree, easily covered to protect from frost. 500 hours or less. Self-fruitful. (Zaiger)

Juneglo Nectarine Delicious, full flavored early season fruit ripens late June in Central CA, 7-10 days before Independence, two weeks before Double Delight. Semi-freestone when soft-ripe. Winter and frost hardy. 700 hours. Self-fruitful. (Zaiger)

Mericrest Nectarine Very cold hardy, frost hardy, late bloom. Crops after sub zero winters. Large, red-skinned yellow freestone with rich tangy flavor. Very high scoring in taste tests, highly recommended. Mid-July in Central CA. 800 hours. Self-fruitful.

Mission Olive The classic California olive, this variety is the most versatile for the home garden. Whether for curing or oil production, Mission is considered a true edible ornamental. Colder hardier than most olive varieties. Self-fruitful but produces higher yields with a pollenizer.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Fay Elberta Peach Popular yellow freestone: juicy, moderately sweet, flavorful. Fresh/can/freeze/dry. Ripens 1-2 days later than Elberta in Central CA. (August 1st), but blooms earlier. 700 hours. Self-fruitful.

Frost Peach Resistant to peach leaf curl (10-year trials at Washington State Univ.). Delicious yellow freestone. Slight red blush over greenish-yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July ripening. Showy pink bloom in spring. 700 hours. Self-fruitful.

Garden Gold Miniature Peach Delicious yellow freestone, ripe 2 weeks after Elberta, more vigorous than other miniatures. Later bloom, less susceptible to frost damage. Showy blossoms. 5-6 ft. tree. 500 hours or less. Self-fruitful. (Zaiger)

Halehaven Peach From a cross of J.H. Hale and South Haven. Medium to large size, skin red over orange yellow. Yellow freestone flesh is juicy, sweet, low in acid, with excellent flavor. Midseason harvest, about two weeks before Elberta. Dessert/can/freeze. Winter and frost hardy. 900 hours. Self-fruitful.

Indian Free White Peach The all-time highest rated peach at Dave Wilson Nursery fruit tastings. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinize.

O'Henry Peach Popular fresh market yellow freestone and an excellent choice for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-August in Central CA. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

Redhaven Peach Long one of the world's most widely planted peaches. High quality yellow freestone. Ripens early July in Central CA. Frost hardy, excellent producer. Fresh/freeze. 800 hours. Self-fruitful.

Rio Oso Gem Peach Favorite late yellow freestone. Large, sweet, rich flavor, like J.H. Hale. Fresh/freeze. Small tree. Showy bloom. Mid-August in Central CA. 800 hours. Self-fruitful.

White Lady White Peach Among the best of the low acid/high sugar white peaches - a farmer's market favorite. Red-skinned fruits are medium to large, very firm, freestone. Introduced in 1986. 800 hours. Self-fruitful. (Zaiger)

Bartlett Pear World's most popular pear. Early midseason, high quality, tolerates hot summers. 500-600 hours. Self-fruitful in most climates of Western U.S. Elsewhere, pollenized by Bosc, D'Anjou, Winter Nelis.

Comice Pear The famous gift pack pear. Sweet, aromatic, fine texture, superb flavor and quality - one of the best. Short neck, greenish-yellow skin with red blush.

Late harvest. 600 hours. Self-fruitful in most climates of Western U.S. or plant with Bartlett.

D'Anjou Pear Large, short necked, firm, good quality, keeps well. Harvest September 1st, one month after Bartlett in Central CA. 800 hours. Pollenized by Bartlett.

Multi-Bud Pear Asian, Hosui-Shinseiki-20thCent-Chojuro Hosui, Shinseiki, 20th Century and Chojuro budded onto OHxF333 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Warren Pear Excellent quality dessert pear, tree is highly resistant to fire blight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Cold hardy to -20 deg F. From Mississippi. 600 hours. Self-fruitful

Fuyu (Jiro) Persimmon Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Fall harvest. 200 hours. Self-fruitful.

Hachiya Persimmon Large, deep orange-red, acorn-shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental tree. 200 hours. Self-fruitful.

Sugar Twist Pluerry™ Interspecific Plum Newest in the Zaiger Pluerry™ line of high-flavor interspecific plums (plum + cherry), Sugar Twist is unique in that it harvests a month earlier than Sweet Treat. This hybrid has red skin and yellow flesh with an especially enjoyable flavor: cherry sweet with a plum "twist". Pollenized by Flavor King Pluot®, Emerald Beaut plum and most mid to late blooming varieties of Pluot®, Pluerry™ and Japanese plum. Estimated to require 800 chill hours. Patent Pending. (Zaiger)

Beauty Plum Sweet, flavorful plum, more widely adapted than Santa Rosa (more productive in cool, rainy climates). Red over yellow skin, amber flesh streaked red. Ripens June in Central CA, a week or more before Santa Rosa. 250 hours. Self-fruitful.

Elephant Heart Plum Home orchard favorite: large, heart-shaped fruit with sweet, juicy, richly flavored, firm red flesh. Dark reddish-purple mottled skin. Long harvest season - September in Central CA. Hardy, heavy bearing tree. 500 hours or less. Pollenize with Beauty or Santa Rosa.

Late Santa Rosa Plum Medium to large, reddish-purple skin, red-streaked amber flesh. Tart-sweet with rich flavor when fully ripe. Harvest about one month after Santa Rosa. 400 hours or less. Self-fruitful.

Satsuma Plum Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollenized by Santa Rosa or Beauty.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Flavor Grenade Pluot® Interspecific Plum Elongated green fruit with red blush. Crisp texture, explosive flavor. Taste test winner. Hangs on the tree for 4-6 weeks. Pollenized by Flavor King Pluot®, Dapple Dandy Pluot®, Emerald Drop Pluot® or Santa Rosa plum. 300-400 hours. (Pat. No. 12097) (Zaiger)

Flavor Supreme Pluot® Interspecific Plum Taste test winner. Plum/apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central CA, about two weeks before Santa Rosa. 700-800 hours. Pollenized by Santa Rosa and Late Santa Rosa plums, or Flavorosa, Flavor Queen and Geo Pride Pluot®. (Zaiger)

Multi-Bud Pluot® I.S. Plum, FI King-FI Queen-FI Supr-DapDan Flavor King, Flavor Queen, Flavor Supreme and Dapple Dandy budded onto Citation rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

A.C. Sweet Pomegranate Developed by Arthur C. Combe of Beaver Dam, Arizona. Exterior color is red to bright pink, arils are pink to light red. Flavor is sweet and refreshing, seeds are soft and edible. Ripe fruit can hang for weeks without splitting. Very hardy plant will take temperatures to below zero. One of Utah's favored varieties. Required chill hours 100-200. Self-fruitful, best in Zones 6-10.

French Improved Prune California's commercial prune. Reddish purple skin, dark amber flesh. Very sweet, high quality fruit dessert/can/dry. 800 hours. Self-fruitful.

Italian Prune Large, purple skin, freestone. Rich flavor, very sweet when fully ripe. Fresh/dried/canned. Vigorous, cold hardy tree. Late bloom. Late summer harvest. 800 hours. Self-fruitful.

Bluecrop Northern Highbush Blueberry No. 1 variety, the standard of excellence. Upright, vigorous bush. Very productive. Large, firm, great flavor. Fruit does not drop or crack. 800 hours. Self-fruitful.

Blueray Northern Highbush Blueberry Best variety for hot climates. Large, firm fruit, excellent flavor. Upright, vigorous bush, very productive. 800 hours. Self-fruitful

Jubilee Southern Highbush Blueberry Southern Highbush. Midseason, sweet, firm berry. Upright and quite compact bush, with fruit borne on the outer periphery. Chilling requirement is estimated at 400-500 hours.

O'Neal Southern Highbush Blueberry Southern Highbush. Large fruit is especially sweet and flavorful. Early season. 5-6 ft. bush. 200 hours. Self-fruitful, but plant two varieties for largest crops.

Pink Lemonade Northern Highbush Blueberry Pink Lemonade offers something unique in edible fruits. White translucent berries mature to a luscious bright pink and taste wonderfully sweet with a firm, clear texture. 'Pink Lemonade' will produce farther south than many traditional blueberry cultivars. Berry color and flavor will attract both gourmet cooks and those seeking a culinary novelty. However, it is the beauty of the plant that will earn respect of gardeners everywhere.

Sunshine Blue Southern Highbush Blueberry Southern highbush. Great flavored firm berries. Ripens May 10 through June 15 at Gainesville, Florida. Semi-dwarf evergreen bush with great fall color. Showy hot pink flowers fade to white in spring. Self-fruitful. Estimated chilling required 150 hours, but very cold hardy as well.

Baba Red Raspberry Everbearing Red Raspberry - Extra large berries up to 1 1/2" long. Wonderful warm weather variety particularly well suited to southern California's coastal and inland valleys. Fine flavor and good for all uses. Bears heavy crop May-July with a smaller late summer crop through fall. Hardy to zero degrees. Self-fruitful. Best in zones 4-11.

Black Satin Blackberry Vigorous, very productive plant. Large berries. Midseason producer, July in most areas. Requires some support due to heavy cropping and limber, semi-trailing plant structure. USDA zones 6-9.

Boysenberry Thornless Rubus ursinus var. loganobaccus, a hybrid of blackberry, raspberry, dewberry and loganberry. Very large berry up to 2.5", dark maroon in color with an intense, tangy, sweet flavor. Excellent quality with few seeds and a pleasant aroma. Vine-like trailing growth habit. Harvest through summer. Self-fruitful, best in zones 5-10.

Canby Thornless Raspberry Thornless - the only red thornless raspberry. Large to very large fruit are firm, juicy and of fine flavor. Good for all uses. Viroid and aphid resistant. Very winter hardy, grows best in cooler summer areas. Harvest June, July. Self-fruitful, best in zones 4-9.

Fall Gold Raspberry Everbearing - Hybrid of Taylor X wild Korean mountain berry X Fall Red. Large to very large golden berries of excellent flavor. Extremely sweet and soft textured. Very adaptable and winter hardy. Harvest June through fall. Self-fruitful. Best in zones 4-11.

Heritage Raspberry Everbearing - Large, sweet, dark red berries. Mild flavor and excellent quality. Good for all uses. Moderate early crop in June, July. Heavier late crop August through fall. Berries keep well on or off the vine. Upright growth habit. Self-fruitful. Best in Zones 4-11.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Jewell Black Raspberry Produces compact clusters of large to very large fruit. Rich raspberry flavor. Very high quality, good for pies, preserves and fresh use. May-June harvest. Vigorous, hardy vines are the most disease resistant of all black raspberries. Upright habit, no support required. Self-fruitful. Best in zones 4-11.

Olallieberry A cross between Youngberry and Loganberry, classified as a blackberry. Large, elongated fruit with unique sweet-tart flavor: a long-time California fruit stand favorite for fresh-eating, pies and jams. Vine-like (trailing) structure, requires support. Lower chilling requirement than Boysen. Takes up to two years to bear. Zones 7-9, possibly 6-10.

Triple Crown Blackberry Semi-trailing, thornless. Medium to large flavorful berries. Dense foliage prevents sunscald. Vigorous vines to 15' require support. Very productive, reliable harvests. Widely adapted, excellent home garden variety. USDA Zones 5-12.

Willamette Red Raspberry Large to very large, long-conic berries. Very firm and deep red. Lower sugar content, slightly tart flavor. Good for all uses. Berries hold and store well. Main harvest June, July. Some support required. Self-fruitful. Best in Zones 5-10.

Concord (Eastern) Grape Versatile, long-time favorite American grape. Blue-black berry with rich, distinctive flavor, used for table, juice, jelly and wine. 100 hours. Self-fruitful. Cane prune.

Flame Seedless Grape Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens before Thompson. Vigorous. 100 hours. Self-fruitful. Cane or spur prune.

Himrod Seedless Grape Hybrid of Thompson Seedless and American grape. Highest quality pale green berries. Vine more winter hardy than Interlaken. Early harvest. Self-fruitful. Cane prune.

Suffolk Red Seedless Grape Russian seedless x American. Hardier than European grapes, less heat to ripen. Largest berries of the hybrids. Early, excellent quality. 100 hours. Self-fruitful. Cane prune

Thompson Seedless Grape Most popular grape in CA, AZ. Fresh and raisins. Pale green, very sweet. Thin the clusters for larger berries. Needs plenty of heat. 100 hours. Self-fruitful. Cane prune.

Cascade Hops Cascade and Centennial are the basic hops varieties grown for home brewing.

Centennial Hops Cascade and Centennial are the basic hops varieties grown for home brewing.

Issai Hardy Kiwifruit *Actinidia arguta* 'Issai'. Fuzzless fruit: no need to peel. Smaller than the standard kiwi, often sweeter. Very high in vitamin C. Much more winter hardy than Hayward. New growth tender to frost, but plant recovers quickly. Often sets fruit the first year. 300 hours. Self-fruitful.

Ken's Red Female Kiwi *Actinidia arguta*, hardy female kiwi vine producing bright red fruit with a sweet, mild flavor. Ripens in June, July. One of the largest hardy kiwifruit. Requires cross pollination with a hardy male *arguta* type kiwi. Best in zones 5-10.

Dwarf Everbearing Mulberry *Morus sp.* 'Dwarf Everbearing' This bush form of mulberry continuously produces sweet blackberry-like fruit throughout the season. A great choice for container gardening, minor pruning will keep the plant compact. Mature height 6'-8' if grown in the ground. Widely adapted, self-fruitful. USDA zones 5-11.

All-in-One Genetic Semi-Dwarf Almond No. 1 almond for home orchards. Heavy crops of soft shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter and frost hardy. 300-400 hrs. Self-fruitful. (Zaiger)

Colossal Chestnut Thought to be a hybrid of Asian and European chestnuts. High quality medium to large size nuts fall easily from hull, are easy to peel. Large, long-lived, spreading tree. 400-500 hours. Pollenized by Nevada or Colossal seedling.

Nevada Chestnut Pollenizer for Colossal - also a good producer. One Nevada can pollinize 8 to 10 Colossal trees. Not tolerant of alkaline soil. 400-500 hours. Pollenized by Colossal.

Western Schley Pecan Easy to grow, hardy tree. Less fussy about soil and nutrition. Long, tapered, medium-sized, thin-shelled nuts. Fine quality, midseason. 250 hours. Self-fruitful

Franquette Walnut Last English walnut to leaf out, less susceptible to spring frost damage. Very large tree, excellent shade. Fair production of well sealed, thin-shelled, high quality nuts. Pollenizer for Hartley. 700 hours. Self-fruitful. (Rootstock: NCB walnut.)

Idaho Carpathian Walnut Cold hardy carpathian-type. Large, sweet, high quality kernel. Bears young and heavy. Vigorous tree. 700 hours. Self-fruitful. (Rootstock: NCB walnut.)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.
