Local Law No. 2 of the year 2026

Village of Scottsville, County of Monroe

A local law authorizing a property tax levy in excess of the limit established in General Municipal Law §3-c

Be it enacted by the Board of Trustees of the Village of Scottsville as follows:

Section 1. Legislative Intent

It is the intent of this local law to allow the Village of Scottsville to adopt a budget for the fiscal year commencing 2026-2027 that requires a real property tax levy in excess of the “tax levy limit” as defined by General Municipal Law § 3-c.

Section 2. Authority

This local law is adopted pursuant to subdivision 5 of General Municipal Law §3-c, which expressly authorizes a local government’s governing body to override the property tax cap for the coming fiscal year by the adoption of a local law approved by a vote of sixty percent (60%) of said governing body.

Section 3. Tax Levy Limit Override

The Board of Trustees of the Village of Scottsville, County of Monroe, is hereby authorized to adopt a budget for the fiscal year commencing 2026-2027 that requires a real property tax levy in excess of the amount otherwise prescribed in General Municipal Law §3-c.

Section 4. Severability

If a court determines that any clause, sentence, paragraph, subdivision, or part of this local law or the application thereof to any person, firm or corporation, or circumstance is invalid or unconstitutional, the court’s order or judgment shall not affect, impair, or invalidate the remainder of this local law, but shall be confined in its operation to the clause, sentence, paragraph, subdivision, or part of this local law or in its application to the person, individual, firm or corporation or circumstance, directly involved in the controversy in which such judgment or order shall be rendered.

Section 5. Effective date

This local law shall take effect immediately upon filing with the Secretary of State.

Short Environmental Assessment Form

Part 1 - Project Information

Instructions for Completing

Part 1 – Project Information. The applicant or project sponsor is responsible for the completion of Part 1. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by or useful to the lead agency; attach additional pages as necessary to supplement any item.

Part 1 – Project and Sponsor Information			
Village of Scottsville			
Name of Action or Project: Local Law 1-2026			
Project Location (describe, and attach a location map): Village of Scottsville limits			
Brief Description of Proposed Action: to amend the Village Code of the Village of Scottsville, Chapter 140 - Storm Sewer System, Chapter 139 - Stormwater Management, 145 - Subdivision of land Chapter 170 - Zoning See attached for the complete text of the local law.			
Name of Applicant or Sponsor: Village of Scottsville		Telephone: 585-889-6050	
		E-Mail: villageclerk@scottsvilleny.gov	
Address: 22 Main St.			
City/PO: Scottsville		State: NY	Zip Code: 14546
1. Does the proposed action only involve the legislative adoption of a plan, local law, ordinance, administrative rule, or regulation? If Yes, attach a narrative description of the intent of the proposed action and the environmental resources that may be affected in the municipality and proceed to Part 2. If no, continue to question 2.			NO <input type="checkbox"/>
			YES <input checked="" type="checkbox"/>
2. Does the proposed action require a permit, approval or funding from any other government Agency? If Yes, list agency(s) name and permit or approval:			NO <input type="checkbox"/>
			YES <input checked="" type="checkbox"/>
3. a. Total acreage of the site of the proposed action?		704 acres	
b. Total acreage to be physically disturbed?		0 acres	
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor?		25 acres	
4. Check all land uses that occur on, are adjoining or near the proposed action:			
<input type="checkbox"/> Urban <input checked="" type="checkbox"/> Rural (non-agriculture) <input type="checkbox"/> Industrial <input type="checkbox"/> Commercial <input type="checkbox"/> Residential (suburban)			
<input type="checkbox"/> Forest <input type="checkbox"/> Agriculture <input type="checkbox"/> Aquatic <input type="checkbox"/> Other(Specify):			
<input type="checkbox"/> Parkland			

5. Is the proposed action, a. A permitted use under the zoning regulations?	NO	YES	N/A
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Consistent with the adopted comprehensive plan?	NO	YES	N/A
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
6. Is the proposed action consistent with the predominant character of the existing built or natural landscape?	NO	YES	
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
7. Is the site of the proposed action located in, or does it adjoin, a state listed Critical Environmental Area? If Yes, identify: _____	NO	YES	
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
8. a. Will the proposed action result in a substantial increase in traffic above present levels? b. Are public transportation services available at or near the site of the proposed action? c. Are any pedestrian accommodations or bicycle routes available on or near the site of the proposed action?	NO	YES	
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
9. Does the proposed action meet or exceed the state energy code requirements? If the proposed action will exceed requirements, describe design features and technologies: _____ _____	NO	YES	
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
10. Will the proposed action connect to an existing public/private water supply? If No, describe method for providing potable water: _____ _____	NO	YES	
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
11. Will the proposed action connect to existing wastewater utilities? If No, describe method for providing wastewater treatment: _____ _____	NO	YES	
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
12. a. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? b. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory?	NO	YES	
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
13. a. Does any portion of the site of the proposed action, or lands adjoining the proposed action, contain wetlands or other waterbodies regulated by a federal, state or local agency? b. Would the proposed action physically alter, or encroach into, any existing wetland or waterbody? If Yes, identify the wetland or waterbody and extent of alterations in square feet or acres: _____ _____ _____	NO	YES	
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

14. Identify the typical habitat types that occur on, or are likely to be found on the project site. Check all that apply:		
<input type="checkbox"/> Shoreline <input type="checkbox"/> Forest <input type="checkbox"/> Agricultural/grasslands <input type="checkbox"/> Early mid-successional <input type="checkbox"/> Wetland <input type="checkbox"/> Urban <input checked="" type="checkbox"/> Suburban		
15. Does the site of the proposed action contain any species of animal, or associated habitats, listed by the State or Federal government as threatened or endangered?	NO	YES
	<input checked="" type="checkbox"/>	<input type="checkbox"/>
16. Is the project site located in the 100-year flood plan?	NO	YES
	<input type="checkbox"/>	<input checked="" type="checkbox"/>
17. Will the proposed action create storm water discharge, either from point or non-point sources? If Yes, a. Will storm water discharges flow to adjacent properties? b. Will storm water discharges be directed to established conveyance systems (runoff and storm drains)? If Yes, briefly describe: _____ _____	NO	YES
	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	<input type="checkbox"/>
18. Does the proposed action include construction or other activities that would result in the impoundment of water or other liquids (e.g., retention pond, waste lagoon, dam)? If Yes, explain the purpose and size of the impoundment: _____ _____	NO	YES
	<input checked="" type="checkbox"/>	<input type="checkbox"/>
19. Has the site of the proposed action or an adjoining property been the location of an active or closed solid waste management facility? If Yes, describe: _____ _____	NO	YES
	<input checked="" type="checkbox"/>	<input type="checkbox"/>
20. Has the site of the proposed action or an adjoining property been the subject of remediation (ongoing or completed) for hazardous waste? If Yes, describe: _____ _____	NO	YES
	<input checked="" type="checkbox"/>	<input type="checkbox"/>
I CERTIFY THAT THE INFORMATION PROVIDED ABOVE IS TRUE AND ACCURATE TO THE BEST OF MY KNOWLEDGE Applicant/sponsor/name: _____ Date: _____ Signature: _____ Title: _____		

Part 3 Attachment

The proposed action consists of adoption of a local law pertaining to stormwater and erosion with amendments to Chapter 140 – Storm Sewer System, Chapter 139 – Stormwater Management, Chapter 145 – Subdivision of Law, and Chapter 170 – Zoning; and

1. The proposed action involves amendments to the Village Code to bring the Code into compliance with requirements of the New York State Department of Conservation for regulating stormwater and erosion in an MS4 community (the “Proposed Action”). The action itself does not involve any physical changes to the Village, but will result in review of future proposed projects in accordance with the new proposed stormwater and erosion control standards.
2. Air, Water, Waste, Erosion, Drainage, and Site Disturbance. The Proposed Action will not create any significant adverse impact in the existing air quality or water quality, nor in solid waste production, nor potential for erosion, nor promote flooding or drainage problems. There are no proposed alterations to any properties within the Village with the passage of the local law and the regulations will only further protect the water quality of the Village by improving stormwater and erosion control requirements.
3. Noise and Visual Impacts. The Proposed Action will not create any adverse noise or visual impacts. There are no proposed alterations to any property within the Village.
4. Agriculture, Archeology, Historic, Natural, or Cultural Resources, Community or Neighborhood Character. The Proposed Action will not adversely impact agricultural, archeological, historical, natural, or cultural resources. There are no proposed alterations to any properties within the Village with the passage of the local law and the regulations will only further protect the water quality of the Village by improving stormwater and erosion control requirements.
5. Vegetation, Fish, Wildlife, Significant, Habitats, Threatened or Endangered Species, Wetlands, Flood Plains. The Proposed Action will not have a significant adverse impact on plant or animal life. There are no proposed alterations to any properties within the Village with the passage of the local law. Any impact to specific areas within the Village would be evaluated as part of the SEQRA review for future projects.
6. Community Plans, Use of Land, and Natural Resources. The Proposed Action is consistent with and in furtherance of the goals set forth in the Village’s Comprehensive Plan.

7. **Growth, Subsequent Development, etc.** The Proposed Action will not induce any significant or adverse growth or subsequent development. The new stormwater and erosion control standards will further protect the environmental condition of the Village.
8. **Long Term, Short Term, Cumulative, or Other Effects.** The Proposed Action will not have any significant adverse long term, short term, cumulative, or other environmental effects.
9. **Critical Environmental Area.** The Proposed Action will not have an impact on any designated Critical Environmental Area as set forth in 6 NYCRR Section 617.14(g).
10. **Traffic.** The Proposed Action will not have a significant adverse impact on vehicular traffic. As set forth above, the adoption of the proposed local law is not approving any alteration of land.
11. **Public Health and Safety.** The Proposed Action will not have a significant adverse impact on public health or safety. The Proposed Action is subject to all applicable Federal, State, and Local laws, regulations, and code requirements including all requirements of the Village of Scottsville, Monroe County Department of Transportation, Monroe County Water Authority, Monroe County Department of Health, and New York State Department of Environmental Conservation.

Based upon a review by the Village of Scottsville Board of Trustees of the Short Environmental Assessment Form, other information and documents concerning the proposed action, and the criteria set forth in 6 NYCRR 617.7(c) of the SEQRA regulations, the Village of Scottsville Board of Trustees has determined that the proposed action will not have a significant adverse impact on the environment and an environmental impact statement need not be prepared. The Village of Scottsville Board of Trustees issues a Negative Declaration for the action pursuant to 6 NYCRR § 617.7.

RESOLUTION

State Environmental Quality Review Act

Local Law 1-2026 to amend the Village Code of the Village of Scottsville, Chapter 140 – Storm Sewer System, Chapter 139 – Stormwater Management, Chapter 145 – Subdivision of land, Chapter 170 – Zoning

WHEREAS, Village of Scottsville proposes to amend the Village Code of the Village of Scottsville, Chapter 140 – Storm Sewer System, Chapter 139 – Stormwater Management, Chapter 145 – Subdivision of land, Chapter 170 – Zoning

; and

WHEREAS, in accordance with the New York State Environmental Quality Review Act, Article 8 of the Environmental Conservation Law and the regulations adopted pursuant thereto at 6 NYCRR Part 617, as amended (collectively referred to as “SEQRA”), the Board of Trustees must satisfy the applicable requirements set forth in SEQRA, as necessary, prior to making a final determination whether to undertake the Project; and

WHEREAS, the Applicant has submitted Part 1 of the Short Environmental Assessment Form (“EAF”); and

WHEREAS, the Board of Trustees has completed its review of Parts 2 and 3 of the Short EAF.

NOW, THEREFORE, BE IT RESOLVED BY THE MEMBERS OF THE BOARD OF TRUSTEES AS FOLLOWS:

Section 1. The Project is classified as an Unlisted Action as it does not exceed any existing thresholds of the Type I list as established through 6 NYCRR § 617, and each of the Whereas Clauses in this Resolution are incorporated by reference as specific findings of this Resolution and shall have the same effect as the other findings herein.

Section 2. The Board of Trustees has considered the local law pursuant to the parameters and criteria set forth in applicable provisions found under 6 NYCRR §§ 617.2 and 617.3.

Section 3. The Board of Trustees has considered the significance of the potential environmental impacts of the Local Law by: (i) carefully reviewing and examining the responses to the Short EAF, and completing the analyses for Parts 2 and 3 of the Short EAF; (ii) considering the criteria set forth in 6 NYCRR § 617.7(c); and (iii) thoroughly analyzing the identified areas of relevant environmental concern.

Section 4. The Board of Trustees hereby finds that the Local Law will result in no potential significant adverse environmental impacts requiring the preparation of an environmental impact statement for the Local Law. The Board of Trustees thus issues a Negative Declaration for the action pursuant to 6 NYCRR § 617.7. The reasoning supporting the Board of Trustees’s determination of significance for the Local Law is more fully set forth in the Part 3 Determination of Significance.

Section 5. The Board of Trustees accepts the findings contained in Parts 2 and 3 of the Short EAF and directs the Board of Trustees Mayor to sign and date Part 3 of the Short EAF.

Section 6. The requirements of SEQRA have been satisfied and this Resolution shall take effect immediately.

**LOCAL LAW NUMBER 1 OF 2026 TO AMEND THE VILLAGE CODE OF THE
VILLAGE OF SCOTTSVILLE, CHAPTER 140 - STORM SEWER SYSTEM, CHAPTER
139 - STORMWATER MANAGEMENT, CHAPTER 145 – SUBDIVISION OF LAND,
AND CHAPTER 170 - ZONING**

**BE IT ENACTED, by the Village Board of Trustees of the Village of Scottsville,
Monroe County, State of New York, as follows:**

Section 1.1 Chapter 140 – Storm Sewer System, shall be amended as follows:

Section 140-8(B)(2) Repair or replace individual sewage treatment systems **as follows:** ~~in accordance with Monroe County Health Department oversight and approvals.~~

1. ~~In accordance with 10 NYCRR Appendix 75A and Monroe County Health Department oversight and approvals to the maximum extent practicable.~~
2. ~~A design professional licensed to practice in New York State shall prepare design plans for any type of absorption field that involves:~~
 - a. ~~Relocating or extending an absorption area to a location not previously approved for such.~~
 - b. ~~Installation of a new subsurface treatment system at the same location.~~
 - c. ~~Use of alternate system or innovative system design or technology.~~
3. ~~A written certificate of compliance shall be submitted by the design professional to the municipality at the completion of construction of the repair or replacement system.~~

Section 140-14 Any person receiving a notice of violation may appeal the determination of the SMO to the Village of Scottsville **Board of Trustees** within 15 days of its issuance, which shall hear the appeal within 30 days after the filing of the appeal, and within five days of making its decision, file its decision in the office of the Municipal Clerk and mail a copy of its decision by certified mail to the discharger.

Section 1.2 Chapter 145 – Subdivision of land, shall be amended to add sub-section A.16 to Section 145-4 and language into Section 145-6 as follows:

Section 145-4(A) After presentation and discussion of the rough sketches as referred to in § 145-3, the subdivider shall present to the Board, together with an initial fee in an amount set forth from time to time by resolution of the Board of Trustees, payable to the Village Clerk, five copies of a preliminary layout and a topographic map of the area to be subdivided, at a scale of not more than 100 feet to the inch, showing or accompanied by the following information:

...

(16) A Stormwater Pollution Prevention Plan (SWPPP) consistent with the requirements of Chapter 139 shall be required for Preliminary layout review. The SWPPP shall meet the

performance and design criteria and standards in Chapter 139. The approved Preliminary Subdivision Plat shall be consistent with the provisions of Chapter 139.

Section 145-6(A) Final subdivision plat approval shall be granted, granted with conditions or disapproved pursuant to Village Law § 7-728, Subdivision 6. A Stormwater Pollution Prevention Plan (SWPPP) consistent with the requirements of Chapter 139 shall be required for Final subdivision plat approval. The SWPPP shall meet the performance and design criteria and standards in Chapter 139. The approved Final Subdivision Plat shall be consistent with the provisions of Chapter 139.

Section 1.3 Chapter 170 – Zoning, shall be amended as follows:

Section 170-62(B(11) A storm drainage and grading plan showing the collection and disposal of stormwaters or, if applicable, a stormwater pollution prevention plan. All SWPPPs shall be consistent with and meet the performance and design criteria and standards in Chapter 139.

Section 1.4 Chapter 139 – Stormwater Management shall be repealed in its entirety and replaced as follows:

Article 1 – General Provisions

139-1 – Findings of Fact

It is hereby determined that:

- A. Land development activities and associated increases in site impervious cover often alter the hydrologic response of local watersheds and increase stormwater runoff rates and volumes, flooding, stream channel erosion, or sediment transport and deposition;
- B. This stormwater runoff contributes to increased quantities of water-borne pollutants, including siltation of aquatic habitat for fish and other desirable species;
- C. Clearing and grading during construction tends to increase soil erosion and add to the loss of native vegetation necessary for terrestrial and aquatic habitat;
- D. Improper design and construction of stormwater management practices can increase the velocity of stormwater runoff thereby increasing stream bank erosion and sedimentation;
- E. Impervious surfaces allow less water to percolate into the soil, thereby decreasing groundwater recharge and stream baseflow;
- F. Substantial economic losses can result from these adverse impacts on the waters of the municipality;
- G. Stormwater runoff, soil erosion and nonpoint source pollution can be controlled and minimized through the regulation of stormwater runoff from land development activities;

- H. The regulation of stormwater runoff discharges from land development activities in order to control and minimize increases in stormwater runoff rates and volumes, soil erosion, stream channel erosion, and nonpoint source pollution associated with stormwater runoff is in the public interest and will minimize threats to public health and safety.
- I. Regulation of land development activities by means of performance standards governing stormwater management and site design will produce development compatible with the natural functions of a particular site or an entire watershed and thereby mitigate the adverse effects of erosion and sedimentation from development.

139-2 – Purpose

The purpose of this Chapter is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in Section 139-1 hereof. This Chapter seeks to meet those purposes by achieving the following objectives:

- A. Meet the requirements of minimum measures 4 and 5 of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit no. GP-0-24-001 or as amended or revised;
- B. Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities GP-0-20-001 or as amended or revised;
- C. Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;
- D. Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;
- E. Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and
- F. Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.

139-3 – Statutory Authority

In accordance with Section 10 of the Municipal Home Rule Law of the State of New York, the Village Board of Trustees of the Village of Scottsville has the authority to enact local laws and amend local laws and for the purpose of promoting the health, safety or general welfare of the Village of Scottsville and for the protection and enhancement of its physical environment. The

Board of Trustees may include in any such local law provisions for the appointment of any municipal officer, employees, or independent contractor to effectuate, administer and enforce such local law.

139-4 – Applicability

- A. This Chapter shall be applicable to all land development activities as defined in this local law, Section 139-6;
- B. The municipality shall designate a Stormwater Management Officer who shall accept and review all stormwater pollution prevention plans and forward such plans to the applicable municipal board. The Stormwater Management Officer may (1) review the plans, or (2) upon approval by the Board of Trustees engage the services of a registered professional engineer to review the plans, specifications and related documents at a cost not to exceed a fee schedule established by said governing board, or (3) accept the certification of a licensed professional that the plans conform to the requirements of this law. The applicant shall be responsible for any costs incurred by engaged engineering services at a cost not to exceed the established fee schedule. At the discretion of the Village, an escrow account or deposit may be required to be established prior to incurring engineering fees;
- C. All land development activities subject to review and approval by the Village of Scottsville Planning Board shall be reviewed subject to the standards contained in this Chapter; and
- D. All land development activities not subject to review as stated in Section 139-4(C) shall be required to submit a Stormwater Pollution Prevention Plan (SWPPP) to the Stormwater Management Officer who shall approve the SWPPP if it complies with the requirements of this law.

139-5 – Exemptions

- A. Agricultural activity as defined in this local law.
- B. Routine maintenance activities that disturb less than five acres and are performed to maintain the original line and grade, hydraulic capacity or original purpose of a facility.
- C. Repairs to any stormwater management practice or facility deemed necessary by the Stormwater Management Officer.
- D. Any part of a subdivision if a plat for the subdivision has been approved by the Village of Scottsville on or before the effective date of this law.
- E. Land development activities for which a building permit has been approved on or before the effective date of this law.
- F. Cemetery graves.

- G. Installation of fence, sign, telephone, and electric poles and other kinds of posts or poles.
- H. Emergency activity immediately necessary to protect life, property or natural resources.
- I. Activities of an individual engaging in home gardening by growing flowers, vegetable and other plants primarily for use by that person and their family.
- J. Landscaping and horticultural activities in connection with an existing structure.

Article II – Stormwater Control

The terms used in this Chapter or in documents prepared or reviewed under this Chapter shall have the meaning as set forth in this section.

139-6 – Definitions

AGRICULTURAL ACTIVITY

The activity of an active farm including grazing and watering livestock, irrigating crops, harvesting crops, using land for growing agricultural products, and cutting timber for sale, but shall not include the operation of a dude ranch or similar operation, or the construction of new structures associated with agricultural activities.

APPLICANT

Property owner or agent of a property owner who has filed an application for a land development activity.

BUILDING

Any structure, either temporary or permanent, having walls and a roof, designed for the shelter of any person, animal, or property, and occupying more than 100 square feet of area.

CHANNEL

A natural or artificial watercourse with a definite bed and banks that conducts continuously or periodically flowing water.

CLEARING

Any activity that removes the vegetative surface cover.

DEDICATION

The deliberate appropriation of property by its owner for general public use.

DEPARTMENT

The New York State Department of Environmental Conservation.

DESIGN MANUAL

The New York State Stormwater Management Design Manual, 2024, or as amended or revised, that serves as the official guide for stormwater management principles, methods and practices.

DEVELOPER

A person who undertakes land development activities.

EROSION CONTROL MANUAL

The most recent version of the New York Standards and Specifications for Erosion and Sediment Control manual, commonly known as the Blue Book.

GRADING

The excavation or fill of material, including the resulting conditions thereof.

IMPERVIOUS COVER

Those surfaces, improvements and structures that cannot effectively infiltrate rainfall, snow melt and water (e.g., building rooftops, pavement, sidewalks, driveways, etc.).

INDUSTRIAL STORMWATER PERMIT

A State Pollutant Discharge Elimination System permit issued to a commercial industry or group of industries which regulates the pollutant levels associated with industrial stormwater discharges or specifies on-site pollution control strategies.

INFILTRATION

The process of percolating stormwater into the subsoil.

JURISDICTIONAL WETLAND

An area that is inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support a prevalence of vegetation typically adapted for life in saturated soil conditions, commonly known as hydrophytic vegetation.

LAND DEVELOPMENT ACTIVITY

Construction activity including clearing, grading, excavating, soil disturbance or placement of fill that results in land disturbance of equal to or greater than 20,000 square feet, or activities disturbing less than 20,000 square feet of total land area that is part of a larger common plan of development or sale, even though multiple separate and distinct land development activities may take place at different times on different schedules.

LANDOWNER

The legal or beneficial owner of land, including those holding the right to purchase or lease the land, or any other person holding proprietary rights in the land.

MAINTENANCE AGREEMENT

A legally recorded document that acts as a property deed restriction, and which provides for long-term maintenance of stormwater management practices.

NONPOINT SOURCE POLLUTION

Pollution from any source other than from any discernible, confined, and discrete conveyances, and shall include, but not be limited to, pollutants from agricultural, silvicultural, mining, construction, subsurface disposal and urban runoff sources.

PHASING

Clearing a parcel of land in distinct pieces or parts, with the stabilization of each piece completed before the clearing of the next.

POLLUTANT OF CONCERN

Sediment or a water quality measurement that addresses sediment (such as total suspended solids, turbidity or siltation) and any other pollutant that has been identified as a cause of impairment of any water body that will receive a discharge from the land development activity.

PROJECT

Land development activity.

RECHARGE

The replenishment of underground water reserves.

SEDIMENT CONTROL

Measures that prevent eroded sediment from leaving the site.

SENSITIVE AREAS

Cold water fisheries, shellfish beds, swimming beaches, groundwater recharge areas, water supply reservoirs, habitats for threatened, endangered or special concern species.

SPDES GENERAL PERMIT FOR CONSTRUCTION ACTIVITIES GP-0-20-001

A permit under the New York State Pollutant Discharge Elimination System (SPDES) issued to developers of construction activities to regulate disturbance of one or more acres of land.

SPDES GENERAL PERMIT FOR STORMWATER DISCHARGES FROM MUNICIPAL SEPARATE STORMWATER SEWER SYSTEMS GP-0-24-001

A permit under the New York State Pollutant Discharge Elimination System (SPDES) issued to municipalities to regulate discharges from municipal separate storm sewers for compliance with EPA established water quality standards and/or to specify stormwater control standards.

STABILIZATION

The use of practices that prevent exposed soil from eroding.

STOP WORK ORDER

An order issued which requires that all construction activity on a site be stopped.

STORMWATER

Rainwater, surface runoff, snowmelt and drainage.

STORMWATER HOTSPOT

A land use or activity that generates higher concentrations of hydrocarbons, trace metals or toxicants than are found in typical stormwater runoff, based on monitoring studies.

STORMWATER MANAGEMENT

The use of structural or non-structural practices that are designed to reduce stormwater runoff and mitigate its adverse impacts on property, natural resources and the environment.

STORMWATER MANAGEMENT FACILITY

One or a series of stormwater management practices installed, stabilized and operating for the purpose of controlling stormwater runoff.

STORMWATER MANAGEMENT OFFICER

An employee or officer designated by the municipality to accept and review stormwater pollution prevention plans, forward the plans to the applicable municipal board and inspect stormwater management practices

STORMWATER MANAGEMENT PRACTICES (SMPS)

Measures, either structural or nonstructural, that are determined to be the most effective, practical means of preventing flood damage and preventing or reducing point source or nonpoint source pollution inputs to stormwater runoff and water bodies.

STORMWATER POLLUTION PREVENTION PLAN (SWPPP)

A plan for controlling stormwater runoff and pollutants from a site during and after construction activities.

STORMWATER RUNOFF

Flow on the surface of the ground, resulting from precipitation.

STORMWATER SYSTEM

The stormwater system of the Village of Scottsville consisting of the pipes laid in the streets and rights-of-way with all other appurtenances which are used to control stormwater.

SURFACE WATERS OF THE STATE OF NEW YORK

Lakes, bays, sounds, ponds, impounding reservoirs, springs, wells, rivers, streams, creeks, estuaries, marshes, inlets, canals, the Atlantic ocean within the territorial seas of the state of New York and all other bodies of surface water, natural or artificial, inland or coastal, fresh or salt, public or private (except those private waters that do not combine or effect a junction with natural surface or underground waters), which are wholly or partially within or bordering the state or within its jurisdiction. Storm sewers and waste treatment systems, including treatment ponds or lagoons which also meet the criteria of this definition, are not waters of the state. This exclusion applies only to manmade bodies of water which neither

were originally created in waters of the state (such as a disposal area in wetlands) nor resulted from impoundment of waters of the state.

WATERCOURSE

Permanent or intermittent stream or other body of water, either natural or man-made, which gathers or carries surface water.

WATERWAY

A channel that directs surface runoff to a watercourse or to the public storm drain

139-7 – Stormwater Pollution Prevention Plans

- A. No application for approval of a land development activity shall be reviewed until the appropriate board has received a Stormwater Pollution Prevention Plan (SWPPP) prepared in accordance with the specifications in this Chapter.
- B. All SWPPPs shall provide the following background information and erosion and sediment controls:
 - 1. Background information about the scope of the project, including location, type and size of project.
 - 2. Site map/construction drawing(s) for the project, including a general location map. At a minimum, the site map should show the total site area; all improvements; areas of disturbance; areas that will not be disturbed; existing vegetation; on-site and adjacent off-site surface water(s); wetlands and drainage patterns that could be affected by the construction activity; existing and final slopes; locations of off-site material, waste, borrow or equipment storage areas; and location(s) of the stormwater discharges(s);
 - 3. Description of the soil(s) present at the site;
 - 4. Construction phasing plan describing the intended sequence of construction activities, including clearing and grubbing, excavation and grading, utility and infrastructure installation and any other activity at the site that results in soil disturbance. Consistent with the New York Standards and Specifications for Erosion and Sediment Control (Erosion Control Manual), not more than five (5) acres shall be disturbed at any one time unless pursuant to an approved SWPPP.
 - 5. Description of the pollution prevention measures that will be used to control litter, construction chemicals and construction debris from becoming a pollutant source in stormwater runoff;
 - 6. Description of construction and waste materials expected to be stored on-site with updates as appropriate, and a description of controls to reduce pollutants from these materials including storage practices to minimize exposure of the materials to stormwater, and spill -prevention and response;
 - 7. Temporary and permanent structural and vegetative measures to be used for soil stabilization, runoff control and sediment control for each stage of the project from initial land clearing and grubbing to project close-out;
 - 8. A site map/construction drawing(s) specifying the location(s), size(s) and length(s) of each erosion and sediment control practice;

9. Dimensions, material specifications and installation details for all erosion and sediment control practices, including the siting and sizing of any temporary sediment basins;
10. Temporary practices that will be converted to permanent control measures;
11. Implementation schedule for staging temporary erosion and sediment control practices, including the timing of initial placement and duration that each practice should remain in place;
12. Maintenance schedule to ensure continuous and effective operation of the erosion and sediment control practice;
13. Name(s) of the receiving water(s);
14. Delineation of SWPPP implementation responsibilities for each part of the site;
15. Description of structural practices designed to divert flows from exposed soils, store flows, or otherwise limit runoff and the discharge of pollutants from exposed areas of the site to the degree attainable; and
16. Any existing data that describes the stormwater runoff at the site.

- C. Land development activities as defined in Section 139-6 and meeting Condition “A”, “B” or “C” below shall also include water quantity and water quality controls (post-construction stormwater runoff controls) as set forth in Section D below as applicable:

Condition A - Stormwater runoff from land development activities discharging a pollutant of concern to either an impaired water identified on the Department’s 303(d) list of impaired waters or a Total Maximum Daily Load (TMDL) designated watershed for which pollutants in stormwater have been identified as a source of the impairment.

Condition B - Stormwater runoff from land development activities disturbing five (5) or more acres.

Condition C - Stormwater runoff from land development activity disturbing between one (1) and five (5) acres of land during the course of the project, exclusive of the construction of single family residences and construction activities at agricultural properties.

- D. SWPPP Requirements for Condition A, B and C:

1. All information in Section 139-7(B)
2. Description of each post-construction stormwater management practice;
3. Site map/construction drawing(s) showing the specific location(s) and size(s) of each post-construction stormwater management practice;
4. Hydrologic and hydraulic analysis for all structural components of the stormwater management system for the applicable design storms
5. Comparison of post-development stormwater runoff conditions with pre-development conditions
6. Dimensions, material specifications and installation details for each post-construction stormwater management practice;

7. Maintenance schedule to ensure continuous and effective operation of each post-construction stormwater management practice.
 8. Maintenance easements to ensure access to all stormwater management practices at the site for the purpose of inspection and repair. Easements shall be recorded on the plan and shall remain in effect with transfer of title to the property.
 9. Inspection and maintenance agreement binding on all subsequent landowners served by the on-site stormwater management measures in accordance with Article 2, Section 4 of this local law.
 10. For Condition A, the SWPPP shall be prepared by a landscape architect, certified professional or professional engineer and must be signed by the professional preparing the plan, who shall certify that the design of all stormwater management practices meet the requirements in this local law.
- E. A copy of the SWPPP shall be retained at the site of the land development activity during construction from the date of initiation of construction activities to the date of final stabilization.

139-9 – Other Environmental Permits

The applicant shall assure that all other applicable environmental permits have been or will be acquired for the land development activity prior to approval of the final stormwater design plan.

139-10 – Contractor Certification

- A. Each contractor and subcontractor identified in the SWPPP who will be involved in soil disturbance and/or stormwater management practice installation shall sign and date a copy of the following certification statement before undertaking any land development activity: “I certify under penalty of law that I understand and agree to comply with the terms and conditions of the Stormwater Pollution Prevention Plan. I also understand that it is unlawful for any person to cause or contribute to a violation of water quality standards.”
- B. The certification must include the name and title of the person providing the signature, address and telephone number of the contracting firm; the address (or other identifying description) of the site; and the date the certification is made.
- C. The certification statement(s) shall become part of the SWPPP for the land development activity.

139-11 – Performance and Design Criteria for Stormwater Management and Erosion and Sediment Control

All land development activities shall be subject to the following performance and design criteria:

- A. Technical Standards. For the purpose of this local law, the following documents shall serve as the official guides and specifications for stormwater management. Stormwater management practices that are designed and constructed in accordance with these technical documents shall be presumed to meet the standards imposed by this law:
 1. The New York State Stormwater Management Design Manual (New York State Department of Environmental Conservation, most current version or its successor, hereafter referred to as the Design Manual)
 2. New York Standards and Specifications for Erosion and Sediment Control, (Empire State Chapter of the Soil and Water Conservation Society, 2004, most current version or its successor, hereafter referred to as the Erosion Control Manual).
- B. Equivalence to Technical Standards. Where stormwater management practices are not in accordance with technical standards, the applicant or developer must demonstrate equivalence to the technical standards set forth in Section 139-11(A) and the SWPPP shall be prepared by a licensed professional.
- C. Water Quality Standards. Any land development activity shall not cause an increase in turbidity that will result in substantial visible contrast to natural conditions in surface waters of the state of New York.
- D. Excavations. All excavations for connection to the stormwater system shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the Village.

139-12 – Maintenance, Inspection and Repair of Stormwater Facilities

- A. The applicant or developer of the land development activity or their representative shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the applicant or developer to achieve compliance with the conditions of this local law. Sediment shall be removed from sediment traps or sediment ponds whenever their design capacity has been reduced by fifty (50) percent.
- B. For land development activities as defined in Section 139-6 and meeting Condition A, B or C in Section 139-7(C), the applicant shall have a qualified professional conduct site inspections and document the effectiveness of all erosion and sediment control practices every 7 days and within 24 hours of any storm event producing 0.5 inches of precipitation or more. Inspection reports shall be maintained in a site log book.

139-13 – Maintenance Easement

Prior to the issuance of any approval that has a stormwater management facility as one of the requirements, the applicant or developer must execute a maintenance easement agreement that shall be binding on all subsequent landowners served by the stormwater management facility. The easement shall provide for access to the facility at reasonable times for periodic inspection by the Village to ensure that the facility is maintained in proper working condition to meet design standards and any other provisions established by this local law. The easement shall be recorded by the grantor in the office of the County Clerk after approval by the legal counsel for the Village.

139-14 – Maintenance After Construction

The owner or operator of permanent stormwater management practices installed in accordance with this law shall ensure they are operated and maintained to achieve the goals of this Chapter. Proper operation and maintenance also includes as a minimum, the following:

- A. A preventive/corrective maintenance program for all critical facilities and systems of treatment and control (or related appurtenances) which are installed or used by the owner or operator to achieve the goals of this law.
- B. Written procedures for operation and maintenance and training new maintenance personnel.
- C. Discharges from the SMPs shall not exceed design criteria or cause or contribute to water quality standard violations in accordance with Section 139-11(C).

139-15 – Maintenance Agreements

The Village shall approve a formal maintenance agreement for stormwater management facilities binding on all subsequent landowners and recorded in the office of the County Clerk as a deed restriction on the property prior to final plan approval. The Village, in lieu of a maintenance agreement, at its sole discretion may accept dedication of any existing or future stormwater management facility, provided such facility meets all the requirements of this Chapter and includes adequate and perpetual access and sufficient area, by easement or otherwise, for inspection and regular maintenance.

Article III – Liability, Administration and Enforcement

139-16 – Permit and Liability

- A. Permit. It shall be unlawful for any person to enter into, open, connect with, use, or do any repair or maintenance work, with respect to the stormwater system except under the inspection and direction of the Superintendent of Public Works and without first obtaining a written permit from the Superintendent of Public Works.
- B. Permit Application. The owner, or his or her agent, shall make application on a special form furnished by the Village of Scottsville. The permit application shall be supplemented by such plans, specifications and other information considered pertinent and requested by the Superintendent of Public Works in accordance with this Chapter. A permit and

inspection fee, in an amount set forth, from time to time, by resolution of the Board of Trustees, shall be paid to the Village Clerk at the time the application is filed.

- C. **Liability.** The approval of plans for proposed drainage systems and flood hazard prevention requirements shall not constitute a representation, guaranty or warranty of any kind or nature by the Village of Scottsville or by an officer or employee thereof of the safety, operation, adequacy or intent of the proposed facilities and shall create no liability upon or cause for action against such public body, officer or employee for any damages that may result from construction pursuant thereto. The owner, before a permit is issued under this article, shall agree to indemnify the Village of Scottsville from any loss or damage that may directly or indirectly be occasioned by the installation of the connection to the stormwater system. All costs and expense incident to the installation and connection to the Stormwater System shall be borne by the owner. The owner shall also be liable for the initial cost of installation and continued maintenance of the connection to the Stormwater System.

139-17 – Construction Inspection

A. **Erosion and Sediment Control Inspection.**

The Village Stormwater Management Officer may require such inspections as necessary to determine compliance with this law and may either approve that portion of the work completed or notify the applicant wherein the work fails to comply with the requirements of this law and the stormwater pollution prevention plan (SWPPP) as approved. To obtain inspections, the applicant shall notify the Village enforcement official at least 48 hours before any of the following as required by the Stormwater Management Officer:

1. Start of construction
 2. Installation of sediment and erosion control measures
 3. Completion of site clearing
 4. Completion of rough grading
 5. Completion of final grading
 6. Close of the construction season
 7. Completion of final landscaping
 8. Successful establishment of landscaping in public areas
- B. If any violations are found, the applicant and developer shall be notified in writing of the nature of the violation and the required corrective actions. No further work shall be conducted except for site stabilization until any violations are corrected and all work previously completed has received approval by the Stormwater Management Officer.
- C. **Stormwater Management Practice Inspections.** The Village Stormwater Management Officer or their designee, is responsible for conducting inspections of stormwater management practices (SMPs). All applicants are required to submit “as built” plans for any stormwater management practices located on-site after final construction is completed. The plan must show the final design specifications for all stormwater management facilities and must be certified by a professional engineer.

- D. Inspection of Stormwater Facilities After Project Completion. Inspection programs shall be established on any reasonable basis, including but not limited to: routine inspections; random inspections; inspections based upon complaints or other notice of possible violations; inspection of drainage basins or areas identified as higher than typical sources of sediment or other contaminants or pollutants; inspections of businesses or industries of a type associated with higher than usual discharges of contaminants or pollutants or with discharges of a type which are more likely than the typical discharge to cause violations of state or federal water or sediment quality standards or the SPDES stormwater permit; and joint inspections with other agencies inspecting under environmental or safety laws. Inspections may include, but are not limited to: reviewing maintenance and repair records; sampling discharges, surface water, groundwater, and material or water in drainage control facilities; and evaluating the condition of drainage control facilities and other stormwater management practices.
- E. Submission of Reports. The Village Stormwater Management Officer may require monitoring and reporting from entities subject to this law as are necessary to determine compliance with this law.
- F. Right-of-Entry for Inspection. When any new stormwater management facility is installed on private property or when any new connection is made between private property and the public storm water system, the landowner shall grant to the Village the right to enter the property at reasonable times and in a reasonable manner for the purpose of inspection as specified in paragraph D.

139-18 – Performance Guarantee and Fees for Services

- A. Construction Completion Guarantee. In order to ensure the full and faithful completion of all land development activities related to compliance with all conditions set forth by the Village in its approval of the Stormwater Pollution Prevention Plan, the Village may require the applicant or developer to provide, prior to construction, a performance bond, cash escrow, or irrevocable letter of credit from an appropriate financial or surety institution which guarantees satisfactory completion of the project and names the Village as the beneficiary. The security shall be in an amount to be determined by the Village based on submission of final design plans, with reference to actual construction and landscaping costs. The performance guarantee shall remain in force until the surety is released from liability by the Village, provided that such period shall not be less than one year from the date of final acceptance or such other certification that the facility(ies) have been constructed in accordance with the approved plans and specifications and that a one year inspection has been conducted and the facilities have been found to be acceptable to the Village. Per annum interest on cash escrow deposits shall be reinvested in the account until the surety is released from liability.
- B. Maintenance Guarantee. Where stormwater management and erosion and sediment control facilities are to be operated and maintained by the developer or by a corporation that owns

or manages a commercial or industrial facility, the developer, prior to construction, may be required to provide the Village with an irrevocable letter of credit from an approved financial institution or surety to ensure proper operation and maintenance of all stormwater management and erosion control facilities both during and after construction, and until the facilities are removed from operation. If the developer or landowner fails to properly operate and maintain stormwater management and erosion and sediment control facilities, the Village may draw upon the account to cover the costs of proper operation and maintenance, including engineering and inspection costs.

- C. Fees for Services. The Village may require any person undertaking land development activities regulated by this Chapter to pay reasonable costs at prevailing rates for review of permits, SWPPPs, inspections, or SMP maintenance performed by the Village or performed by a third party for the Village.

- D. Recordkeeping. The Village may require entities subject to this Chapter to maintain records demonstrating compliance with this Chapter.

139-19 – Enforcement and Penalties

- A. Notice of Violation. When the Village determines that a land development activity is not being carried out in accordance with the requirements of this Chapter, it may issue a written notice of violation to the landowner. The notice of violation shall contain:
 - a. the name and address of the landowner, developer or applicant;
 - b. the address when available or a description of the building, structure or land upon which the violation is occurring;
 - c. a statement specifying the nature of the violation;
 - d. a description of the remedial measures necessary to bring the land development activity into compliance with this local law and a time schedule for the completion of such remedial action;
 - e. a statement of the penalty or penalties that shall or may be assessed against the person to whom the notice of violation is directed;
 - f. a statement that the determination of violation may be appealed to the Village Board of Trustees by filing a written notice of appeal within fifteen (15) days of service of notice of violation.

- B. Stop Work Orders. The Village may issue a stop work order for violations of this Chapter. Persons receiving a stop work order shall be required to halt all land development activities, except those activities that address the violations leading to the stop work order. The stop work order shall be in effect until the Village confirms that the land development activity is in compliance and the violation has been satisfactorily addressed. Failure to address a stop work order in a timely manner may result in civil, criminal, or monetary penalties in accordance with the enforcement measures authorized in this local law.

- C. Violations. Any land development activity that is commenced or is conducted contrary to this Chapter, may be restrained by injunction or otherwise abated in a manner provided by law.
- D. Penalties. In addition to or as an alternative to any penalty provided herein or by law, any person who violates the provisions of this local law shall be guilty of a violation punishable by a fine not exceeding three hundred fifty dollars (\$350) or imprisonment for a period not to exceed six months, or both for conviction of a first offense; for conviction of a second offense both of which were committed within a period of five years, punishable by a fine not less than three hundred fifty dollars nor more than seven hundred dollars (\$700) or imprisonment for a period not to exceed six months, or both; and upon conviction for a third or subsequent offense all of which were committed within a period of five years, punishable by a fine not less than seven hundred dollars nor more than one thousand dollars (\$1000) or imprisonment for a period not to exceed six months, or both. However, for the purposes of conferring jurisdiction upon courts and judicial officers generally, violations of this local law shall be deemed misdemeanors and for such purpose only all provisions of law relating to misdemeanors shall apply to such violations. Each week's continued violation shall constitute a separate additional violation.
- E. Withholding of Certificate of Occupancy. If any building or land development activity is installed or conducted in violation of this local law the Stormwater Management Officer may prevent the occupancy of said building or land.
- F. Restoration of Lands. Any violator may be required to restore land to its undisturbed condition. In the event that restoration is not undertaken within a reasonable time after notice, the Village may take necessary corrective action, the cost of which shall become a lien upon the property until paid.

Section 1.5 This local law is adopted pursuant to NYS Municipal Home Rule Law.

Section 1.6 All other local laws and ordinances of the Village of Scottsville that are inconsistent with the provisions of this local law are hereby repealed provided, however, that such repeal shall only be to the extent of such inconsistency. In all other respects, this local law shall be in addition to such other local laws or ordinances regulating and governing the subject matter covered herein.

Section 1.7 If any clause, sentence, paragraph, word, section or part of this local law shall be adjudged by any court of competent jurisdiction to be unconstitutional, illegal or invalid, such judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, word, section, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

Section 1.8 This local law will take effect upon filing in the office of the New York State Secretary of State.

INTERMUNICIPAL AGREEMENT

THIS AGREEMENT made and entered into on _____, 2026 (the “Agreement”) by and between by the VILLAGE OF SCOTTSVILLE, a municipal corporation having an office located at 22 Main St., Ste. 3, Scottsville, NY 14546 (hereinafter “the Village”), the WHEATLAND-CHILI CENTRAL SCHOOL DISTRICT, a municipal corporation having offices located at 13 Beckwith Avenue, Scottsville, NY 14546 (hereinafter “the District”), and with all such municipal corporations being organized under the Laws of the State of New York and authorized to enter into this agreement pursuant to Article 5-G of the New York State General Municipal Law.

WHEREAS, the parties, pursuant to General Municipal Law Section 119-o, are authorized to enter into joint municipal agreements to share in their municipal obligations; and

WHEREAS, the District is in need of approximately ten (10) tons of salt for the winter season to maintain District property and the Village is in possession of in excess of ten (10) tons of salt used to maintain Village roads and facilities located at the Village’s Department of Public Works at 389 Scottsville Mumford Rd, Scottsville, NY (the “DPW Facility”); and

NOW THEREFORE, in furtherance of the provisions of the New York State General Municipal Law Section 5-G and in consideration of the premises and the mutual promises and understandings contained herein, it is hereby agreed by and between the Village and District as follows:

Section 1. PROVISION OF SALT

- A. The Village agrees to provide the District with approximately ten (10) tons of salt, upon request, on an as-needed basis as is mutually agreed upon by the parties in accordance with the provisions of this Agreement, at a rate of \$100 per ton during the term of this Agreement. The District shall pay the Village \$1,000 upon execution of this Agreement.
- B. The District shall be responsible for picking up salt from the Village’s Department of Public Works facility located at the DPW Facility on an as needed basis. The District shall provide at least forty-eight (48) hours’ notice to the Village Superintendent of Public Works before the District picks up any salt from the DPW Facility. Whenever possible, any such request shall be made in writing by email transmission. However, should circumstances necessitate a verbal request to be made, such request shall be confirmed by the District, in writing, within twenty-four (24) hours following the request or, if such request is made on a weekend or holiday, on the next business day following the request.
- C. The District shall be responsible for loading salt from the DPW Facility onto any District truck or equipment and the Village shall provide access to District employees or independent contractors to the DPW Facility for the purpose of loading salt onto any

District truck or equipment.

- D. The Village shall not be responsible for supervising District employees or independent contractors while District employees or independent contractors are loading salt onto any District truck or equipment. The District shall remain fully responsible for its own employee's compensation, including, but not limited to salary, benefits and worker's compensation coverage.

Section 2. TERM.

This Agreement shall be for a term of one (1) year following its execution. Either party may terminate this Agreement upon forty-five (45) days prior written notice to the other party, without cause, and upon either party exercising its right to terminate, this Agreement shall immediately terminate.

Section 3. INDEMNIFICATION.

The District shall indemnify, defend, and hold harmless the Village for any and all damages or injuries to persons or property or claims, actions, obligations, liabilities, costs, expenses, including without limitation court costs and reasonable attorney's fees, resulting from the negligent, grossly negligent or willful act or failure to act of the District and District's employees or independent contractors arising out of this Agreement.

Section 4. NOTICE.

Any notice or demand upon either party shall be deemed to be sufficient for all purposes hereunder if given personally or mailed to the other party hereto, to the attention of the Village Clerk or District [REDACTED], at such party's address as set forth above or to such other address as may be furnished in writing by such party. Any notice that is mailed shall be effective when deposited in the United States mail, duly addressed, and with first class postage affixed.

Section 5. MISCELLANEOUS.

- A. This Agreement shall be deemed to be executed in the Village of Scottsville, New York, County of Monroe, and the State of New York and shall be governed by and construed in accordance with the laws of the State of New York without regard to choice of law provisions.
- B. Any modification of this Agreement must be in writing and executed with the same formality as the Agreement herein.
- C. The parties agree that any and all claims, controversies or suits asserted by or against the Village or District arising out of this Agreement or related thereto shall be heard only in the courts of the State of New York located in the County of Monroe.

- D. This Agreement and its attachments constitute the entire understanding between the Village and District and supersede all prior agreements and understandings relating to the subject matter hereof.
- E. The captions to the sections of this Agreement are solely for the convenience of the parties and are not an aid in the interpretation of this Agreement.
- F. This Agreement may be executed in two or more counterparts, all of which together shall constitute one and the same instrument.
- G. Both parties hereto warrant and represent that they have full right, power, and authority to execute this Agreement.

[No further text on this page. Signature page to follow.]

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the day and year written.
