

# Business Credit Building

Our mission is to help small business owners, entrepreneurs and real estate investors build a credit profile for their business and gain access to the funding they need without putting their personal credit at risk.

We accomplish this with our step-by-step business credit building system and funding programs designed from the practical, real-world needs we see every day among small businesses.

Our business credit building system is a platform that allows us through completing all necessary requirements to ensure your business is 'credit ready'. This is the foundation to establishing a credit profile for your business.

Inside the platform we have access to our highly researched network of vendors, suppliers, retailers, fleet cards, business credit cards and funding sources that report to the major business credit reporting agencies.

We are dedicated to helping you build business credit and access loans, lines of credit and other funding vehicles through our extensive network of banks, credit unions, lenders and investors we've established relationships with over our 12+ years' experience in the industry.

Rather than using a cookie-cutter approach to business credit building; we take a customized approach as we believe every business is unique with different needs, funding goals, and credit demands.

Our mission has never changed: We'll help you build a creditworthy business and obtain the funding you need without having to put your personal credit or personal assets at risk.

By building a creditworthy business, you get to leverage the power of your company, build a business credit asset, and protect your personal credit at the same time.
