

Thank you for choosing At Home Medical Providers for your healthcare needs. Each of our Providers have been hand-selected and have backgrounds in acute care, emergency and primary care medicine. We specialize in the care of seniors and chronically ill patients. We are here to answer your questions about your health, medical conditions, treatment plans and collaborate with other community Providers.

We have established a model for primary care that will allow you to receive medical care in the comfort of your residence. Our medical Providers will be making routine visits to see you in the facility where you reside. An appointment is scheduled for an Initial visit to establish care with a Provider once we receive the completed New Patient Paperwork packet provided by the facility. An initial physical exam is performed as well, and your medical history and medications will be reviewed. You will then be scheduled for weekly follow-up visits for the following 3 weeks, and then monthly thereafter. The facility staff may also schedule other visits on an as-needed basis for any new symptoms or concerns.

If you have any questions, please feel free to contact our office at 208-286-8670. Our staff will be happy to assist you. We look forward to continuing to provide the best medical care to you and your loved ones.

Respectfully,

Daniel J. Allen, DO

Greg Barron, NP-C
