

At Home Medical Providers is pleased to offer quality care for residents in both Assisted Living and Skilled Nursing facilities, as well as providing medical direction by a Certified Medical Director (CMD), Dr. Daniel Allen. Our team of providers includes a Physician, four Nurse Practitioners, a Physician Assistant, and 3 Medical Assistants. We set ourselves apart from other house calls groups by our unique pairing of a provider with a Medical Assistant to provide and coordinate care in the facility.

As a CMD, Dr. Allen and his team will provide direct supervision of care for their own patients in the community as well as “back-up” care when any other resident’s provider cannot be reached. We offer same-day and next-day visits for existing and future residents. In addition to making face-to-face visits, our providers also offer a broad range of other services including 24-7 availability, care plan oversight, transitional care management, chronic care management, in-house lab draws, wound care, and joint injections.

Our services are designed to help chronically ill geriatric patients access the care they need when and where they need it. Our collaborative approach allows both the facility and At Home Medical Providers to take a resident-centered, individualized approach to care. Our goals are to promote the best outcomes possible, be a leader in care initiatives and clinical innovation, and improve quality of life for the residents.

Thank you for choosing At Home Medical Providers to care for your residents!

Dr. Daniel Allen, DO
