To Whom It May Concern:

Cashton Farm Supply LTD and Super Soy LLC are dedicated to Organic agriculture and are committed to being industry leaders in Organic feed manufacturing and distribution. We are continually looking for ways to improve our processes and adapt to an ever-changing business environment.

Bob Mackin at Tenurgy approached us with a no-commitment utility bill review, and Cashton Farm Supply LTD and Super Soy LLC proceeded. A utility audit was an opportunity for us to lower our utility expenses without impacting our operations or services.

The utility audit conducted by Tenurgy identified over \$70,000 in refunds. There was no risk involved; the utility audit process was simple and completed remotely with little time involved for us.

The Tenurgy utility audit team reduced our expenses, improving our business, allowing us to focus on what we do best, organic feed manufacturing and distribution.

Any commercial business or company in the agricultural industry should take advantage of Tenurgy's no-risk utility audit. If you want to reduce your utility expenses, we highly recommend Tenurgy.

Sincerely,

Jerri Olson
