Field Services

MGF Services' installation and service crews are centered in multiple segments of the capital equipment industry, serving all of the United States:

Core product offering includes:

- Machinery Systems
- Corrugated/Packaging
- Commercial Presses
- Newspaper Presses
- Gravure Presses
- Chiller installations
- Finishing lines
- Inserting and stitching
- Machinery Upgrade & Remanufacturing
- Machinery Installation and Repair Services
- Mechanical - Rigging, Machinist
- Electrical
- Pipefitting
- Sheet Metal
- Optical Machine Alignment

Our Job Structure and Project Organization requires us to be responsible and competent in many different aspects of field operations:

Site Project Leader

This individual is responsible for all site project activities. Directs skilled trade group leaders. Works with the operations team and is a major customer interface person. Responsible for project safety plan management.

Project Manager

This individual is responsible to provide support for the project. Prepared detail project schedules. Coordinates tools and equipment. Provides technical and engineering support for the project.

Field Superintendents

All skilled trades workers are divided by individual trade groups (mechanical, electrical and piping, sheet metal). A field superintendent manages each group within the MGF Services organization. Their responsibility is to insure quality workmanship that meets the customer's specifications in the agreed time schedule.

Site Skilled Trades Leader

Responsible for the management of the skilled trades group. Coordinates daily work assignments. Assure quality workmanship. Responsible for conformance to corporate and customer safety requirements.

Project Management Service

MGF Services has developed a Project Management System designed for the Machinery and Press Installation Industries. The objective of this system is to provide the utmost in project monitoring abilities and allows us to document and share project status with our customers on a timely basis.

About the MGF Services Inspection Document

Formal paperwork is a great way to establish total and complete communication between MGF Services and our clients. The purpose of this documentation is to monitor the various quality expectations of a given project in advance of the start of the job. In this document, you will find:

- Mechanical Inspection Data
- Electrical Inspection Data
- Piping Inspection Data
- Equipment Alignment Data
- Service Call Report

Our most recent project history for Equipment Installation, Service, Repair, and Related includes work for:

MAN Roland, Inc. • Goss International, Inc. – Dover, NH • North American Cerutti • Zerand Corporation • KYMC • Advance Publications • Pactiv, St. Charles IL • ASTI, Inc. - WI • RIMA Systems, Inc. – Atlanta, GA • TKS USA, Inc. – Sterling, TX • Cenvo – Nationwide locations • Universal Graphix, Inc. – Rockland, MA • Sauk Valley Newspapers – Sterling, IL • Various other equipment manufacturers and owners.

Benefits and the MGF Services Advantage:
