- Rebuilding Services (up to 50,000 lbs.)
Gear Boxes, Blowers, Transmission Cases, Printing Presses, Cylinder & Shaft Repair
- Full service assembly facility to handle complete assemblies or sub-assemblies as required

Featuring the Cryogenic Slitter Roll

Folders and slitting equipment can be a bottleneck if rollers are not properly maintained. Avoid costly downtime with our new Slitter Roller that outlasts OEM standard product life expectancy by two and a half times. These specialty rollers undergo a cryogenic treatment that extends the benefits of heat treating which allows MGF to offer a full 2-year limited warranty.

Visit mgf-services.com for more information on cryogenic treatment of metals and other materials. Or send us your specs through our online form and MGF will provide you a no-obligation quote to replace old or worn slitter rollers with this highly-affordable, leading-edge technology.
