Former Board & Nose Refurbishing

Printing: Folders/folding process on Web presses

Ceramic/Teflon coating provides excellent protection for more than 600 million impressions. Available for steel and aluminum noses.

Former Board

- Boards disassembled and cleaned; reassembled with new fittings
- Bars Rails repaired — chrome plated and precision ground
- Boards and noses assembled, precision aligned for accurate performance

Former Nose

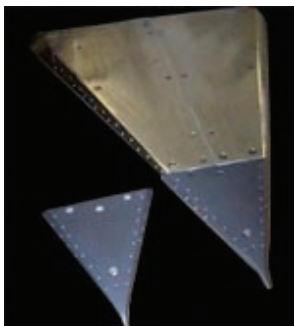

- Gouges and deep paper wear lines filled and re-formed to achieve original performance standards
- Carbide tips inspected and replaced as needed
- Thick chrome plating process used to ensure longer life
- Precision polished before and after plating process
