LSD (0.25) =	9.4	0.1	ns

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.10; non-GMO = \$3.10

Test Comments: *A lot of top half of the stalks had fallen off at harvest. Stalk lodging was limited but the ears hung low on the stalks and forced us to run the combine snoots on the ground to gather ears. Plenty of rain all growing season and good drainage contributed to the above average yield results. Most grain moistures were below 16%. Many area fields still have unharvested soybeans as the wet fall lingers.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
