About us

J & M Security Solutions (JMSS) is a security systems integrator specializing in the field of IP video surveillance, Access Control, Wireless, Video Analytics and IoT sensor technologies.

NOMAD

The NOMAD is a rapidly deployable, highly scalable, intelligent security appliance. Its simple design and adaptability allows you to quickly deploy multiple security technologies in one device.

Intelligent Autonomous Situational Awareness

Rapidly Deployable

The NOMAD unit is built to house all of the security technology in one small form factor enclosure. The unit can be mounted on any surface using simple hand tools and powered by multiple sources including solar.

Scalable Technology

The NOMAD unit incorporates multiple security technologies into one physical enclosure and logically connects them to provide a seamless, event based alerting and surveillance solution.

Intelligence at the Edge

Each NOMAD is built with AI/ML edge computing capabilities providing autonomous, rapid response to events in its environment. The system is open platform and can integrate with all command and control systems.

Integration

Examples of security technology the NOMAD incorporates:

- IP surveillance cameras
- Gunshot Detection
- Wireless device detection
- License Plate Recognition
- Many more!
