**InMotion and Your Company:**

***A Progressive Partnership  
Through Automation and Support***

# **INMOTION,LLC**

Robotics • Automation • Components

## **Who We Are:**

InMotion, LLC is a company specializing in customer support and service for more than fifteen years

## **Focus Areas:**

- Robotic systems and integration
- Custom manufacturing equipment
- Facility support
- Manufacturing solutions
- Automation

## **Overarching Improvement Strategies:**

- Reducing labor-intensive practices
- Increasing overall production and throughput
- Improving quality and accuracy of your manufacturing processes

## **Business Structure:**

Two Lawrenceburg, TN locations:

### **Location 1:**

- Robotic cell assembly
- Training
- Fabrication
- Components
- Equipment building
- Support Staff

### **Location 2:**

- Tooling/Fixture Design and Manufacturing
- Engineering

## **Single Source Opportunity**

Professional staff focused on providing complete support for customer projects:

- Designers
- Machinists
- Engineering support
- Project management
- Electrical support
- Maintenance support
- Programmers
- Onsite installation and training

## **Specialized Areas:**

- Custom equipment and machinery
- Palletizing and Pick/Place systems
- Robotic material handling systems
- Robotic press tending systems
- Robotic welding systems
- Workpiece fixtures and tooling
- Robotic training support
- Manufacturing equipment refurbishment
- PLC Design and build
- Dedicated automation equipment

# **INMOTION,LLC**

Robotics • Automation • Components

## **Reasons for choosing InMotion:**

- Local Service through InMotion and our partners
- Constant growth through robotic technology
- InMotion is listed as a Preferred Partner with ABB
- InMotion is also listed as a Platinum Integrator with ABB
- InMotion builds and services systems with Panasonic, Motoman, and Fanuc robots
- Superior product knowledge to assist with your equipment
- Many years experience in robotic system development
- InMotion's desire to always provide excellent service and support
- Training, technical support, and troubleshooting assistance is always available with InMotion

## **Robotic Services:**

Custom cell design and build

Robotic system refurbishment

Robotic system relocation

Robotic system programming

Total integration

Trouble shooting

Service

Training

Workcell planning and design support

## **Other Manufacturing Support Services:**

Fabrication

Tooling and fixtures

Custom machine building

Machine and equipment refurbishment

Assembly line design and build

Contract manufacturing

Automated plasma cutting systems

## CUSTOMER OVERVIEW CONTINUED:

ArvinMeritor

Warren Mfg.

TruForm Mfg.

Quality Industries

AC Inc.

Modine Manufacturing

Amerex Corporation

## InMotion Applications:

The following pictures and videos represent some of InMotion's custom and robotic systems. Our projects include robotic systems for welding, palletizing, material handling, and machine tending.

Our non-robotic systems include presses, welders, assembly machines, work stations, and other applications. We offer design, build, and refurbishment for many different operations. Quality testing machines are also available.

## Savings Opportunities Offered by Robotics

Reduction of labor-intensive practices

Ability to replace inefficient automated systems

Reduced operating costs

Reduced turnover rate

Improved product quality

Scrap and waste reduction

Rework reduction

Equipment flexibility

Ergonomic and safety improvements
