A Hardened Heart

Sharing The Joy
Poetry By Cheryl Murph

The tougher the flesh the harder the man.
A wretched body convinced by ones own self that only they can determine their destination and pursue their own plans.
As one's heart grows older and becomes harder it brings along with it vanity and pride.
Leaving the heart no remorse what so ever even if it tried.
The hardhearted raise's his so to be the same as he, boastful, conceded and stern.
Demanding respect without being earned.
When the body follows the flesh and has a heart as dark as the sea and hard as a stone to often sees no need to reform.
Ones only hope may lie in the Godly heart of a mother that has prayed for her child since the day they were born.
Hardness can never be soften by man or woman alone.
But by the Power of the blood of Jesus Christ even the worst can be set free from the sin they have known.
May every harden heart be turned to moisten clay.
May we all be ready if our Lord comes today!

Remember til our paths cross again, Philippians 4:4-10

Revolutionary Same Day Tooth Replacement

We can give you the smile you deserve in one easy visit!
Using a non-surgical mini dental implant technique (F.I.R.S.T.), it is now possible to permanently replace anything from a single tooth to a full mouth restoration. Your beautiful smile can be seen in 1 or 2 short visits with minimal discomfort, without destroying healthy tooth enamel and without the long healing time or high cost typically associated with conventional dental implants.

F.I.R.S.T.
Certified Dentist
Call today!
864-232-6911

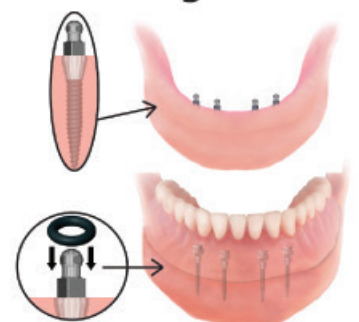

EAT WHATEVER YOU WANT!

New Mini Dental Implant Technology Enjoy secure eating comfort again.

In one short procedure, you can have a stable denture with no surgical sutures nor the typical months of healing.

The MDI System consists of a miniature titanium implant that acts like the root of your tooth and a retaining fixture that is incorporated into the base of your denture.

Let Us Be Your Second Opinion.

Learn how you can contribute to the future of cancer diagnostics.

If you are between the ages of 35 and 79 and have recently been diagnosed with lung cancer, or if your doctor suspects you may have lung cancer, consider participating in a clinical research study to help in the advancement of diagnostic testing and cancer detection.

This study requires only a single visit where a blood sample will be taken. To participate, you must have CT suspicion of lung cancer or have a recent CT showing a pulmonary nodule ≥ 4 mm.

Financial compensation will be provided to qualified participants. Learn more today about how you can participate in this study and help shape the future of cancer research.
