

How to add your newly minted TOKENS to your MetaMask Wallet

Step 1: Open MetaMask

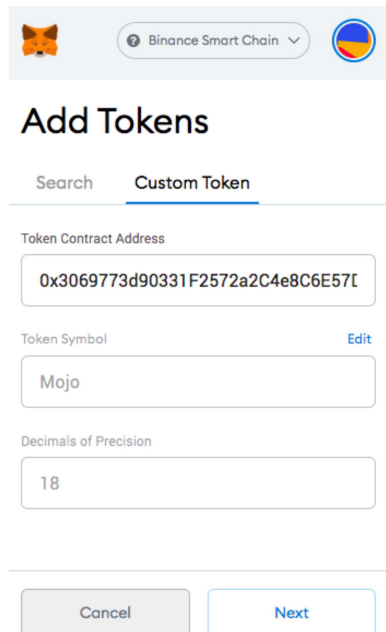

Be sure that 'Binance Smart Chain' network is selected on the top. If not please select it.

Step 2: Please scroll down and click on '**Add Token**'

Step 3: In the next screen, please select '**Custom Token**' tab

Step 4: Enter your token contract address, where it asks for '**Token Contract Address**'

Once you entered your token contract address, the other two fields should fill automatically ie. Your 'Token symbol' and 'Decimal'

The screenshot shows the MetaMask interface for adding a custom token. At the top, the network is set to 'Binance Smart Chain'. Below that, the 'Add Tokens' screen is displayed with the 'Custom Token' tab selected. The 'Token Contract Address' field is filled with '0x3069773d90331F2572a2C4e8C6E57E'. The 'Token Symbol' field is filled with 'Mojo' and has an 'Edit' link. The 'Decimals of Precision' field is filled with '18'. At the bottom, there are 'Cancel' and 'Next' buttons.

Step 5: Click '**NEXT**'. On the next screen, click '**Add Tokens**'

Now your tokens are added successfully in your MetaMask wallet. If you go back to your main wallet screen, you should be able to see the token balance. From here you can send your tokens to anyone.
